Central America,
Social Change,
and Globalization

A man with a mustache, wearing a straw hat and a dark jacket, is sitting on a large, light-colored rock. He is looking back over his shoulder towards the camera. A colorful, patterned bag is resting on the rock next to him. The background is a solid, deep red color.

Transnational Conflicts William I. Robinson, 2003-10-16 Capitalism has disrupted the conventional pattern of revolutionary upheaval civil wars and pacification in Central America William Robinson maps the shape of change in the region

Transnational Conflicts and International Law Constantin von der Groeben, 2014-11-06 Ever since 9 11 the legal classification of transnational conflicts between states and non state armed groups such as Al Qaeda has become a highly debated topic While repeatedly referred to as the War on Terror the legal qualification of the conflict between the US and Al Qaeda remains controversial US military operations in Afghanistan against Al Qaeda and the use of drones against alleged terrorists in Pakistan Yemen and other states pose the question as to whether this conflict truly qualifies as one single global war Similarly transnational conflicts such as the Colombian operation against a FARC base in Ecuador Israel s fight against Hezbollah in Lebanon and Turkish operations against the PKK in northern Iraq pose difficulties as they transcend individual nations political systems and geographical borders Whether the law of war i e humanitarian law is applicable to such conflicts and to what extent human rights law binds the states involved is debated This work aims to provide structure to the current debate and analyzes the applicability of both humanitarian law and human rights law Furthermore it examines and explores approaches to enhance and develop the existing legal framework including proposed new legal regimes for transnational conflicts The author argues against the strict separation of international humanitarian law and human rights law and instead borrows from Colombian authorities experience in their struggle with the FARC to develop an alternate solution combining both legal regimes in an integrated approach

West African Studies Borders and Conflicts in North and West Africa OECD, Sahel and West Africa Club, 2022-02-19 This publication examines the role of border regions in shaping patterns of violence since the end of the 1990s in North and West Africa Using the innovative OECD Spatial Conflict Dynamics indicator SCDi the report looks at the growing relationship between political violence and borderlands at the regional level by analysing more than 170 000 violent events between January 1997 and June 2021 and through the exploration of case studies in the Central and Eastern Sahel

The International Spread of Ethnic Conflict David A. Lake, 1998-03-22 This work focuses on how why and when ethnic conflicts either diffuse by precipitating similar conflicts elsewhere or escalate by bringing in outside parties and how such transnational ethnic conflicts can be managed It focuses specifically on the conflicts in Eastern Europe and Africa

Gender, Conflict and International Humanitarian Law Orly Maya Stern, 2018-07-27 This book conducts a gendered critique of the principle of distinction in international humanitarian law IHL with a focus on recent conflicts in Africa The principle of distinction is core to IHL and regulates who can and cannot be targeted in armed conflict It states that civilians may not be targeted in attack while combatants and those civilians directly participating in hostilities can be The law defines what it means to be a combatant and a civilian and sets out what behaviour constitutes direct participation Close examination of the origins of the principle reveals that IHL was based on a

gendered view of conflict which envisages men as fighters and women as victims of war Problematically this view often does not accord with the reality in new wars today in which women are playing increasingly active roles often forming the backbone of fighting groups and performing functions on which armed groups are highly reliant Using women s participation in new wars in Africa as a study this volume critically examines the principle through a gendered lens questioning the extent to which the principle serves to protect women in modern conflicts and how it fails them By doing so it questions whether the principle of distinction is suitable to effectively regulate the conduct of hostilities in new wars This book will be of much interest to students of international law gender studies African politics war and conflict studies and international relations

Environmental Management in Practice: Vol 1 Paul Compton,Dimitri Devuyst,Luc Hens,Bhaskar Nath,2013-01-11 Focuses on the instruments and tools currently available to the environmental manager A theoretical background to the instruments is given together with an overview of those instruments that are in common use today with particular attention to the physical economic legislative and communication instruments

Pandemic Polity-Building Zbigniew Truchlewski,Ioana- Elena Oana,Alexandru D. Moise,Hanspeter Kriesi,2025-06-05 In 2020 the European Union faced the COVID 19 crisis This book tells the unlikely story of how the European Union survived a crisis that arrived on the heels of a difficult decade during which the EU wrestled with repeated crises from the Euro Area to refugees populism and geopolitics Against all odds a divided polity with a weak centre and low competences in crucial policy domains managed to overcome powerful disincentives to coordinate its way out of the pandemic and create central capacity building Pandemic Polity Building argues that this puzzling outcome stems from COVID 19 s crisis characteristics and the EU s polity features The relative symmetric nature of the pandemic and the deeply disruptive economic shocks revealed the potential long term externalities of a lack of joint action at the European level The EU coordinated a common vaccine procurement scheme and

pooled its fiscal firepower The polity perspective presented here shows how the EU overcame conflicts and managed to coordinate and create new capacity in its centre while relying on a new geography of solidarity within the EU The polity approach allows the authors in this volume to show how the EU did not take a federal path to polity formation Instead it moved towards a polity that serves as an imperfect but solidaristic safety net for its member states The polity approach thus allows this volume to present a firm analytical grasp over the complex crisis politics unleashed on the EU's compound polity This is an open access title available under the terms of a CC BY NC ND 4.0 International licence It is free to read at Oxford Scholarship Online and offered as a free PDF download from OUP and selected open access locations

Advocacy in Conflict Alex de Waal, 2015-05-14 Conflicts in Africa Asia and Latin America have become a common focus of advocacy by Western celebrities and NGOs This provocative volume delves into the realities of these efforts which have often involved compromising on integrity in pursuit of profile and influence Examining the methods used by Western advocates how they relate to campaigns in the countries concerned and their impact expert authors evaluate the successes and failures of past advocacy campaigns and offer constructive criticism of current efforts Taking in a range of high profile case studies including campaigns for democracy in Burma and Latin America for the rights of Palestinians in Gaza and opposing the Lord's Resistance Army in Uganda the authors challenge the assumptions set forth by advocacy organizations

Globalization and Violence, 2006 Michigan Law Review, 1999 Transnational Dynamics of Civil War Jeffrey T. Checkel, 2013-01-24 Combining innovative theory with detailed case studies this book offers a novel account of the border crossing processes of civil war

Journal of Peacebuilding & Development, 2002 International Humanitarian Law Mohammad Naqib Ishan Jan, Abdulrashid Lawan Haruna, 2015 This book is written not because of any foreseen break of armed conflict but armed conflict is an inevitable phenomenon in human and international relations since despite the United Nations Charter prohibition on the use of force in international relations war still exists Hence there is need to have law that regulates conduct in time of armed conflict International humanitarian law IHL being the law of armed conflict has to be disseminated to the entire society through a comprehensive medium that everyone can understand and appreciate

Transnational Actors in War and Peace David Malet, Miriam J. Anderson, 2017-06-01 Transnational Actors in War and Peace explores the identities organization strategies and influence of transnational actors involved in contentious politics armed conflict and peacemaking over the last one hundred years While the study of transnational politics has been a rapidly growing field to date the disparate array of actors have not been analyzed alongside each other making it difficult to develop a common theoretical framework or determine their relative influence on international stability war and peace This work seeks to fill this gap by bringing together a diverse set of scholars focused on a range of transnational actors such as pirates foreign fighters terrorists private military security companies criminal networks religious groups diasporas political exiles NGOs environmental activists global news agencies and feminist advocacy networks Each chapter examines a different

transnational actor and is structured around five components how the actor is organized how it interacts with other actors how it communicates both internally and externally how it influences conflict peace and how it reflects developments in transnationalism
