## Math Worksheet Reddit Tips:

**Rethinking Education in the Age of Technology** Allan Collins, Richard Halverson, 2018 The digital revolution in education is well under way with more and more learners plugged into the online world. How can schools make the most of both the technology and the learning potential of today's born digital students? In this new edition of their groundbreaking book, Collins and Halverson argue that new technologies have transformed our workplaces, our lives, and our culture, and it is time we take the next step to transform learning in and out of schools. The authors show how over time public schooling was so successful that it became synonymous with education. But new technologies risk making schools obsolete, and this book explains why and how today's educators, policymakers, and communities must adapt to provide all learners with access to the new learning tools of the 21st century. Allan Collins and Richard Halverson are not by any means arguing that teachers or schools should go away. Rather, they are saying that they should open their doors and windows, connect to other real and virtual places, be crucial tour guides, and send their children on flights of fancy through our modern memory palaces. From the Foreword by James Paul Gee, Arizona State University. The most convincing account I've read about how education will change in the decades ahead, the authors' analyses are impressive, fair minded, and useful.
