Walruses Tusked Arctic Giants Knowledge:

Walruses M. Martin, 2015-12-02 You can tell a walrus from a seal by the long tusks protruding from their mouth It is said that these are actually teeth that the walrus uses to pull itself out of the water to chip off ice and to protect itself from predators Aside from this we can tell a walrus by its huge flabby body which is said to be made up of a thick layer of fat called blubber Blubber helps walruses survive in cold temperatures Interesting If you want to learn more about the walrus read this book and you will find many amazing facts about this animal that has the ability to survive in the icy cold arctic waters Learn more about their physical features Learn about their social life and how they take care of their young Learn about the different sounds that they make How much does a walrus weight How big is it What do walruses eat How do they hunt for food These questions and more will be answered in this book Read this interesting book to find out This book also comes with more than 20 colorful pictures of the walrus in its habitat With these readers will get to see what their environment looks like which will help them create amazing images in their minds This will help readers understand more about the life of this arctic giant *Picture Book of Knowledge* ,1998 **Arctic discovery and adventure, by the author of 'Brazil, its history, people, natural productions'**. Arctic discovery, 1799 *Second Nature* Jonathan Balcombe, 2010-03-16 With vivid stories and entertaining anecdotes Balcombe gives the human pedestal a strong shake while opening the door into the inner lives of the animals themselves *Kraken and The Colossal Octopus* Bernard Heuvelmans, 2015-12-22 First published in 2003 From Part One Our ignorance of the marine world is much greater still It is such that I do not hesitate to claim that in the ocean everything is still possible Faced with the immensity of Neptune's realm a certain degree of gullibility is preferable to blind incredulity If it was claimed tomorrow that a real mermaid had been captured not just an ugly manatee but a creature boasting Marilyn Monroe's bust and the tail of a coelacanth the attitude of the zoologist who wished to see it would be much more scientifically justifiable than that of his colleague who would merely shrug the news away The sea covers more than three fifths of the surface of the globe but our ships cross it only along rather narrow and fixed paths This book looks at the science behind the stories **Paddle to the Arctic** Don Starkell, 2000-03-25 After his astounding 12 000 mile canoe trip from Winnipeg down to the Amazon recounted in his bestseller *Paddle to the Amazon* on page 48 Don Starkell decided to paddle a kayak from Hudson Bay 3 000 miles through the Northwest Passage This is Don's diary of this journey from Churchill Manitoba to Tuktoyaktuk close to Alaska a voyage by kayak paddled on water or dragged on a sled over the ice that took him three Arctic summers and almost cost him his life Through this compelling book we find ourselves sharing his blazing driving determination to reach his goal as he closes in on his destination with his supplies running out and his ocean highway freezing over making death a near certainty Armchair travel at its best *THE BOOK OF KNOWLEDGE: THE CHILDREN'S ENCYCLOPEDIA* ,1943 *Field & Stream* ,2000-06 FIELD STREAM America's largest outdoor sports magazine celebrates the outdoor experience with great stories compelling
