### **Obsolete to Optimal: How AI can transform aging U.S. enterprise systems in Insurance and Retail**

**2025** AUTHOR:1 - Pratyosh Desaraju, AUTHOR:2 - Dr Rohit Kumar Sachan, PREFACE In an era defined by rapid technological change and increasing customer expectations many of the enterprise systems that underpin the U.S. insurance and retail sectors find themselves at a crossroads. Built decades ago to handle today's challenges these legacy platforms struggle under the weight of ever growing data volumes complex regulatory demands and the onslaught of digitally savvy consumers. Yet within these very constraints lies extraordinary opportunity the chance to transform the obsolete into the optimal by harnessing the power of artificial intelligence. Obsolete to Optimal was born from conversations with technology leaders data scientists and operations executives who shared a common refrain We know AI can help but where do we start and how do we avoid the pitfalls. This book seeks to answer those questions by weaving together strategic insight practical guidance and real world examples. Our goal is twofold first to demystify the process of embedding AI within aging infrastructures and second to show how this integration not only solves immediate operational challenges but also lays the groundwork for sustainable future proof growth. Throughout these pages you will find a progression that mirrors the journey every organization must undertake. We begin by establishing why data modernization is not merely an IT upgrade but a business imperative. From there we delve into the human element empowering employees to work alongside AI embracing new roles and cultivating a culture of continuous learning. Sector specific chapters then illuminate how AI can revolutionize core functions from underwriting and claims processing in insurance to inventory management and personalized marketing in retail. No transformation is without its challenges. We confront head on the technical hurdles of integrating AI with brittle

legacy systems the organizational resistance that accompanies any major change and the ethical considerations that arise when machines make decisions that affect real people By offering frameworks for governance bias mitigation and transparent decision making we aim to equip leaders not only to deploy AI effectively but to do so responsibly Finally as we look toward 2030 we paint a vision of industries that have shed their outdated pasts and embraced an AI powered future one characterized by agility resilience and customer centric innovation Whether you are a C suite executive charting a digital strategy a technology professional tasked with implementation or an academic seeking to understand the practical contours of AI adoption this book is your guide It is my hope that by the final chapter you will see legacy systems not as obstacles but as ripe opportunities platforms ready to be upgraded enhanced and reinvigorated by intelligent automation May Obsolete to Optimal inspire you to embark on that transformation journey and may you find the insights here both actionable and enduring Authors Pratyosh Desaraju Dr Rohit Kumar Sachan *Decision Support Systems* C. W. Holsapple, Andrew B. Whinston, 1996 Predicting sales funnel with a customer-relationship-management tool Juan Ruiz de Bustillo Ohngemach, 2019-11-22 Bachelor Thesis from the year 2019 in the subject Computer Sciences Artificial Intelligence grade 1 3 University of Pompeu Fabra language English abstract In this work the author attempts to examine a small part of artificial intelligence producing a real life approximation of what could be a predictive system based on sales funnel information provided by a customer relationship management tool like Salesforce The work focusses on two main aspects namely the prediction of the sales funnel and a LinkedIn based enrichment tool which sources company data in bulk to enrich existing sales information Along the lines of trying to fulfil these two goals the thesis is comprised of the four typical elements of an end to end advanced analytics project identification of needed data and its sourcing exploratory analysis of said data analytical model selection and design validation and testing of the obtained results obtained in the previous step Artificial Intelligence has matured over the past few years to now become a standard in corporate market and business analyses Those analyses focus mainly on customer acquisition and retention as they drive the revenue This work attempts to create customer retention for example a churn prevention model to help accurately predict the opportunities that have a high propensity to be lost help the salesperson to identify them and be able to quickly react
