Single Neuron Computation Neural Networks Foundations To Applications:

Single Neuron Computation Thomas M. McKenna, Joel L. Davis, Steven F. Zornetzer, 2014-05-19 This book contains twenty two original contributions that provide a comprehensive overview of computational approaches to understanding a single neuron structure The focus on cellular level processes is twofold From a computational neuroscience perspective a thorough understanding of the information processing performed by single neurons leads to an understanding of circuit and systems level activity From the standpoint of artificial neural networks ANNs a single real neuron is as complex an operational unit as an entire ANN and formalizing the complex computations performed by real neurons is essential to the design of enhanced processor elements for use in the next generation of ANNs The book covers computation in dendrites and spines computational aspects of ion channels synapses patterned discharge and multistate neurons and stochastic models of neuron dynamics It is the most up to date presentation of biophysical and computational methods **Temporal Coding in**

the Brain G. Buzsaki, R. Llinas, W. Singer, A. Berthoz, Y. Christen, 2012-12-06 Temporal coding in the brain documents a revolution now occurring in the neurosciences How does parallel processing of information bind together the complex nature of the outer and our inner worlds Do intrinsic oscillations and transient cooperative states of neurons represent the physiological basis of cognitive and motor functions of the brain Some answers to these challenging issues are provided in this book by leading world experts of brain function A common denominator of the works presented in this volume is the nature and mechanisms of neuronal cooperation in the temporal domain The topics range from simple organisms to the human brain The volume is intended for investigators and graduate students in neurophysiology cognitive neuroscience neural computation and neurology *National Library of Medicine Current Catalog* National Library of Medicine (U.S.), 1993 *Neural Computation* , 1999 *Current Catalog* National Library of Medicine (U.S.), 1993 *Computational*
