Artificial Intelligence for Learning Donald Clark, 2020-08-13 Artificial intelligence is creating huge opportunities for workplace learning and employee development. However, it can be difficult for L D professionals to assess what difference AI can make in their organization and where it is best implemented. *Artificial Intelligence for Learning* is the practical guide L D practitioners need to understand what AI is and how to use it to improve all aspects of learning in the workplace. It includes specific guidance on how AI can provide content curation and personalization to improve learner engagement, how it can be implemented to improve the efficiency of evaluation, assessment and reporting, and how chatbots can provide learner support to a global workforce. *Artificial Intelligence for Learning* debunks the myths and cuts through the hype around AI, allowing L D practitioners to feel confident in their ability to critically assess where artificial intelligence can make a measurable difference and where it is worth investing in. There is also critical discussion of how AI is an aid to learning and development, not a replacement, as well as how it can be used to boost the effectiveness of workplace learning, reduce drop off rates in online learning, and improve ROI. With real world examples from companies who have effectively implemented AI and seen the benefits, as well as case studies from organizations including Netflix, British Airways, and the NHS, this book is essential reading for all L D practitioners needing to understand AI and what it means in practice.

Media Management and Artificial Intelligence Alex Connock, 2022-11-18 This cutting edge textbook examines contemporary media business models in the context of Artificial Intelligence. AI and digital transformation. AI has dramatically impacted media production and distribution, from recommendation engines to synthetic humans, from video to text tools to natural language models. AI is really the change agent of the media industry. Answered a natural language generation model when AI was asked about the subject of this book. It will open incredible opportunities. This book seeks to explore them. The media is examined through four sections: Principles maps business models and the key tools of AI; Platforms covers distribution channels in Games, Streamers, Social Networks, Broadcast, and Digital Publishing; Producers covers the engines of content making including Scripted Entertainment, Factual, Content Marketing, Creators, and Music; Finally, Pioneers covers emerging sectors of Podcasting, Esports, the Metaverse, and other AI driven developments. Then in each chapter a standard value creation model is applied, mapping a single sector through development, production, distribution, and monetisation. Diverse case studies are analysed from India, Nigeria, South Korea, South Africa, France, the Netherlands, the US, the UK, Denmark, and China, around creative entrepreneurship, revenue models, profit drivers, rights, and emerging AI tools. Questions are provided for each case, whilst chapter summaries cement learning. Applied and technology focused, this text offers core reading for advanced undergraduate and postgraduates studying Media Management or the relationship between Entertainment Media and Technology. Online resources include chapter by chapter PowerPoint slides and an Instructor's Manual with further exercises and case studies.
