*10 8 work and power for rotational motion openstax* - Sep 07 2022

calculate the torque for each force calculate the work done during the body s rotation by every torque apply the work energy  
theorem by equating the net work done on the body to the change in rotational kinetic energy let s look at two examples and  
use the work energy theorem to analyze rotational motion

evaluate problem solving strategies for rotational kinematics just by using our intuition we can begin to see how rotational quantities like  $\theta$ ,  $\omega$  and  $\alpha$  are related to one another for example if a motorcycle wheel has a large angular acceleration for a fairly long time it ends up spinning rapidly and rotates through many revolutions
