Packed with examples from every nook and cranny of the web it provides easily digestible and applicable patterns for putting these design techniques to work. Organized by the seven deadly sins it includes: Pride use social proof to position your product in line with your visitors values; Sloth build a path of least resistance that leads users where you want them to go; Gluttony escalate customers commitment and use loss aversion to keep them there; Anger understand the power of metaphysical arguments and anonymity; Envy create a culture of status around your product and feed aspirational desires; Lust turn desire into commitment by using emotion to defeat rational behavior; Greed keep customers engaged by reinforcing the behaviors you desire. Now you too can leverage human fallibility to create powerful persuasive interfaces that people will love to use but will you use your new knowledge for good or evil?
