To understand the various business intelligence offerings in SharePoint 2010 you need to understand the core SQL Server business intelligence concepts and the first part of the book presents a comprehensive tutorial on those fundamentals. Pro SharePoint 2010 Business Intelligence Solutions then focuses on specific SharePoint business intelligence investments including Visio Services, Excel Services, SQL Server Reporting Services, Business Connectivity Services, PerformancePoint Services. All of this is done using a practical hands on format with enough examples to empower you to use these products in your real life projects. As compelling as SharePoint and SQL Server business intelligence are together the challenge always has been finding people who understand both SharePoint and SQL Server well enough to deliver such business intelligence solutions.
