Integrating Podcasts to Enhance Communicative, Intercultural, and Media Literacy Skills Jessica Büscher,2024-07-22 Master s Thesis from the year 2022 in the subject Didactics for the subject English Pedagogy Literature Studies grade 1 0 University of Paderborn language English abstract This paper explores how podcasts can revolutionize learning in the EFL English as a foreign language classroom Not only are podcasts easily accessible and transcend knowledge barriers but they also foster close knit communities and offer a variety of genres and formats Although increasingly popular with young adults their potential often remains untapped in schools This study aims to show how teachers can use podcasts effectively in the classroom to promote communicative intercultural and media literacy skills With concrete application examples and creative teaching concepts we want to give teachers the tools to integrate podcasts profitably into EFL lessons and thus make learning more exciting and interactive The Deal ,2010 **Show me your playlist and I tell you who you are** Kathrin Rochow,2012-11-28 Bachelor Thesis from the year 2010 in the subject Psychology Social Psychology grade 1 0 Uppsala University language English abstract In the age of social networking and music streaming playlists are a common tool for organizing sharing or exchanging music in the digital realm Most research however emphasizes mainly political legal and ethical constraints of music sharing practices yet neglects their social impact Thus this paper investigates the social psychological foundation of the playlist and analyses its functionality in establishing social relations and communication Following the theories of Cooley Mead Simmel and Solomon I conducted and analysed interviews with young Swedish men and women in which they talked about their experiences and attitudes towards playlists

Moreover all participants compiled their own personal playlist based on certain personality traits which were aimed to be recognized by the others during the focus group discussion The analysis of the data yields the following conclusions The playlist is a social object facilitating new forms of communication The social nature of the playlist is based on the transformation from objective into subjective culture By internalizing new technologies such as the playlist objects gain social value thus mere musical content becomes a social form It is through sharing and exchanging musical compilations that the playlist as a social form serves as a vehicle or medium facilitating new forms of sociation and communication The communicative function of the playlist is due to its construction through emotions as uniquely subjective judgements based on the I as an emotional self feeling Thus musical compilations take part in the self construction process and can serve as a tool for the symbolic expression of the self Moreover the analysis points out that there are differences in how well certain parts of the self can be communicated by a playlist Emotional expressions of the self are translated into particular universal music patterns most successfully Furthermore the analysis shows that some people like to browse through the playlists of others and judge them thereupon which results in some type of musical voyeurism termed playlistism In conclusion I argue that the musical playlist is both socially implicated and socially implicating
