Integrating historical theological and social scientific approaches to World Christianity this innovative volume centers women's perspectives to illustrate their key role in Christianity becoming a world religion including how they sustain the faith in the present and their expanding role in the future. *Women in World Christianity* features findings from the Women in World Christianity Project a groundbreaking study that produced the first quantitative dataset on gender in every Christian denomination in every country of the world. In Precapitalist Worlds Christopher Chase-Dunn, 2019-04-05 This book demonstrates that Immanuel Wallerstein's reluctance to apply core and periphery to precapitalist transformations is a product of the way he views the luxury trade. It utilizes the study of different kinds of world systems to explore how logics of social reproduction become transformed.

Ethiopian Register, 1998 **European Traditions in the Study of Religion in Africa** Ulrich Berner, 2004 This volume comprises case studies of five centuries of European encounters with and imaginations of Africa encompassing her triple religious heritage: African Traditional Religions, Christianity and Islam. The introductory chapters outline the challenges and present overviews some of them; also analyze the early accounts of European travelers and missionaries. The following contributions examine the lasting legacy of the European Enlightenment in employing an ambivalent language of human equality and universalism while in actual fact consigning Africa to an inferior position. It has been difficult for western scholars to divorce themselves wholly from the perceptions thus established. However, there have been quite different approaches. This is indicated in the papers discussing the role and impact of influential European academics, scholars of religion, theologians, historians and social scientists during the colonial and postcolonial period. Other contributions examine specific institutional centers of African religious studies in Europe. The concluding chapters critically assess European approaches and their use for the study of religion in Africa from an African perspective. Water and Society from Ancient Times to the Present Federica Sulis, Innocent Pikirayi, 2018-10-03 As water availability, management and conservation become global challenges, there is now wide consensus that historical knowledge can provide crucial information to address present crises, offering unique opportunities to appreciate the solutions and mechanisms societies have developed over time.

to deal with water in all its forms from rainfall to groundwater This unique collection explores how ancient water systems relate to present ideas of resilience and sustainability and can inform future strategy Through an investigation of historic water management systems along with the responses to and impact of various water driven catastrophes contributors to this volume present tenable solutions for the long term use of water resources in different parts of the world The discussion is not limited to issues of the past seeking instead to address the resonance and legacy of water histories in the present and future Water and Society from Ancient Times to the Present speaks to an archaeological and non archaeological scholarly audience and will be a useful primary reference text for researchers and graduate students from a variety of disciplinary backgrounds including archaeology anthropology history ecology geography geology architecture and development studies **ch. 16.**
