**Nonparametric Statistical Methods, Solutions Manual** Myles Hollander, Douglas A. Wolfe, 1999-03-25 The importance of nonparametric methods in modern statistics has grown dramatically since their inception in the mid 1930s. Requiring few or no assumptions about the populations from which data are obtained, they have emerged as the preferred methodology among statisticians and researchers performing data analysis. Today these highly efficient techniques are being applied to an ever widening variety of experimental designs in the social, behavioral, biological, and physical sciences. This long awaited Second Edition of Myles Hollander and Douglas A. Wolfe's successful *Nonparametric Statistical Methods* meets the needs of a new generation of users with completely up to date coverage of this important statistical area. Like its highly acclaimed predecessor, the revised edition along with its companion ftp site aims to equip students with the conceptual and technical skills necessary to select and apply the appropriate procedures for a given situation. An extensive array of examples drawn from actual experiments illustrates clearly how to use nonparametric approaches to handle one or two sample location and dispersion problems, dichotomous data, and one way and two way layout problems. Rewritten and updated, this Second Edition now includes new or expanded coverage of Nonparametric regression methods, The bootstrap, Contingency tables, and the odds ratio, Life distributions and survival analysis, Nonparametric methods for experimental designs, More procedures, real world data sets, and problems. Illustrated examples using Minitab and StatXact. An ideal text for an upper level undergraduate or first year graduate course, this text is also an invaluable source for professionals who want to keep abreast of the latest developments within this dynamic branch of modern statistics. An Instructor's Manual presenting detailed solutions to all the problems in the book is available upon request from the Wiley editorial department.     *Introduction to Statistics and Data Analysis* Roxy Peck, Chris Olsen, Jay L.
