Statistical Consulting Statistical Consulting:

Statistical Consulting Javier Cabrera, Andrew McDougall, 2013-04-17 The motivation for this book arose from the statistical consulting course that we have taught regularly for several years In that course we focus on the themes Understanding the statistical consulting process Developing effective communication skills Obtaining experience through case studies In reality there is no substitute for consulting directly with a client and for this interaction to be effective good communication skills are essential Unfortunately this aspect of a statistician's training is often neglected and statistics graduates have little choice but to learn these skills on the job One of the purposes of this book is to address this need Statistical consulting occurs in a diverse range of environments and for tackling real life statistical problems the statistician needs to have a strong interest in the scientific method History itself provides the best examples for developing this interest and so we begin with a brief historical voyage in Chapter 1 There's no time like the present of course and in the remainder of this chapter we describe some of the environments in which statistical consulting plays a major role A detailed discussion on verbal and written communication skills that will be required in a consulting environment is presented in Chapter 2

Teaching of Statistics and Statistical Consulting Jagdish S. Rustagi, Douglas A. Wolfe, 2014-05-10 Teaching of Statistics and Statistical Consulting is a collection of papers dealing with graduate programs in statistics teaching service courses and short courses and training statisticians for employment in industry and government Some papers also deal with the role of statistical consulting in graduate training and teaching statistics at the Open University One paper describes some observations made on graduate program in statistics citing concerns of professionalism competency and a highly structured university curriculum Another paper takes a task analysis approach to designing a regression analysis course where with proper course structuring students will actively learn to do the objectives of the course Other papers discuss consulting and research work at the Australian Government's research organization as well as how to prepare statisticians for future government service or for the private industry One paper deals with some important things that a practicing statistician should know but which are seldom taught in statistics courses Another paper describes teaching statistics at a distance from the Open University in the United Kingdom The collection can prove helpful for academic statisticians in educational institutions to statisticians or to mathematicians employed in the public or private sectors *The Human Side of Statistical Consulting* James R.
