Statistics From Data To Decision

James R Evans

Statistics From Data To Decision:

Statistics Ann E. Watkins, Richard L. Scheaffer, George W. Cobb, 2011 Statistics 2nd Edition teaches statistics with a modern data analytic approach that uses graphing calculators and statistical software. It allows more emphasis to be put on statistical concepts and data analysis rather than following recipes for calculations. This gives readers a more realistic understanding of both the theoretical and practical applications of statistics, giving them the ability to master the subject.

Statistics, Data Analysis, and Decision Modeling James Robert Evans, 2007 This book covers basic concepts of business statistics, data analysis, and management science in a spreadsheet environment. Practical applications are emphasized throughout the book for business decision making. A comprehensive database is developed with marketing financial and production data already formatted on Excel worksheets. This shows how real data is used and decisions are made. Using Excel as the basic software and including such add-ins as PHStat2, Crystal Ball, and TreePlan, this book covers a wide variety of topics related to business statistics: statistical thinking in business, displaying and summarizing data, random variables, sampling, regression analysis, forecasting, statistical quality control, risk analysis, and Monte Carlo simulation systems, simulation modeling and analysis, selection models, and decision analysis, optimization modeling and solving, and analyzing optimization models. For those employed in the fields of quality control, management science, operations management, statistical science, and those who need to interpret data to make informed business decisions. **Business Statistics**

Richard Arnold Johnson, Dean W. Wichern, 2003 *Statistics Made Simple for School Leaders* Susan Rovezzi Carroll, David J. Carroll, 2002-10-16 The chief executive officer of a corporation is not much different from a public school administrator. While CEOs base many of their decisions on data, for school administrators, this type of research may conjure up miserable memories of searching for information to meet a graduate school requirement. However, the value of data-based decision making will continue to escalate, and the school community—students, teachers, parents, and the general public—expect this information to come from their administrators. Administrators are called on to be accountable, but few are capable of presenting the mountain of data that they collect in a cohesive and strategic manner. Most statistical books are focused on statistical theory versus application, but *Statistics Made Simple for School Leaders* presents statistics in a simple, practical, conceptual, and immediately applicable manner. It enables administrators to take their data and manage it into strategic information so the results can be used for action plans that benefit the school system. The approach is user-friendly and leaves the reader with a confident attitude to communicate results and plans to staff and the community.

Doing Statistics for Business with Excel Marilyn K. Pelosi, Theresa M. Sandifer, 2002 The primary goal of this text is to teach students how to do statistics and how to use statistics as a tool for making intelligent informed decisions Statistics is a means to an end not the end itself It is important that students remember what statistics measure and why one might want to use them The pedagogical focus of DOING STATISTICS FOR BUSINESS 2 e is data driven emphasizing statistical reasoning interpretation and decision making Pelosi and Sandifer want to teach the practice of statistics therefore the emphasis is on comparison and interpretation rather than rote calculation To support this approach the text includes discussions of practice as opposed to theory In order to focus on decision making the use of the computer is emphasized to keep students from getting bogged down in the details of the calculations All of the cases found in the text are based on real business situations and data that are relevant to student life Most chapters begin with a motivating example based on real world data This example is then threaded throughout the chapter and to a lesser extent throughout the book DOING STATISTICS FOR BUSINESS 2 e is intended for use in a one or two semester introductory business statistics course for undergraduates The first 10 chapters cover topics that are usually found in a one semester course The remaining chapters are designed to be added or skipped at the instructor's discretion

The Real Work of Data Science Ron S. Kenett, Thomas C. Redman, 2019-03-26 The essential guide for data scientists and for leaders who must get more from their data science teams The Economist boldly claims that data are now the world's most valuable resource But as Kenett and Redman so richly describe unlocking that value requires far more than technical excellence The Real Work of Data Science explores understanding the problems dealing with quality issues building trust with decision makers putting data science teams in the right organizational spots and helping companies become data driven This is the work that spells the difference between a good data scientist and a great one between a team that makes marginal contributions and one that drives the business between a company that gains some value from its data and one in which data truly is the most valuable resource These two authors are world class experts on analytics data management and data quality they've forgotten more about these topics than most of us will ever know Their book is pragmatic understandable and focused on what really counts If you want to do data science in any capacity you need to read it Thomas H Davenport Distinguished Professor Babson College and Fellow MIT Initiative on the Digital Economy I like your book The chapters address problems that have faced statisticians for generations updated to reflect today's issues such as computational Big Data Sir David Cox Warden of Nuffield College and Professor of Statistics Oxford University Data science is critical for competitiveness for good government for correct decisions But what is data science Kenett and Redman give by far the best introduction to the subject I have seen anywhere They address the critical questions of formulating the right problem collecting the right data doing the right analyses making the right decisions and measuring the actual impact of the decisions This book should become
