*Teaching Research Methods in the Social Sciences* Mark Garner,Claire Wagner,Barbara Kawulich,2016-04-01 How can excellence in the teaching of research methods

be encouraged and ensured. This question has become increasingly important following the adoption of research methodology as a core part of many postgraduate and undergraduate courses. There has however been little discussion about the aims and methods of teaching the subject. In this volume a number of authors from a variety of countries and disciplines employ their knowledge and experience towards the development of a pedagogical culture in research methods. Their aim is to establish the extent of common concerns and challenges and to demonstrate ways in which these are being met. Intended to provide both a stimulus and source materials for the development of a more substantial and systematic literature in the field the book will be of great interest to all those teaching research methods courses within social science disciplines.
