**Who's the New Kid in Chemistry?** John D. Butler, 2013-12-12 Who's the New Kid in Chemistry offers an unprecedented look at student engagement and teacher best practices through the eyes of an educational researcher enrolled as a public high school student. Over the course of seventy-nine consecutive days, John D. Butler participates in and observes Rhode Island Teacher of the Year Jessica M. Waters's high school chemistry class, documenting his experiences as they unfold. Who's the New Kid in Chemistry is a compelling example of what can be accomplished when an educational researcher and teacher collaborate in the classroom. This work includes a discussion on flexible homework assignments, data-driven instruction, and thirty teacher best practices. This book is an invaluable resource for teachers across all content areas, masters and doctoral research method classes, and future Teachers of the Year.

**International Handbook of Island Studies** Godfrey Baldacchino, 2018-06-13 From tourist paradises to immigrant detention camps, from offshore finance centres to strategic military bases, islands offer distinct identities and spaces in an increasingly homogenous and placeless world. The study of islands is important for its own sake and on its own terms. But so is the notion that the island is a laboratory, a place for developing and testing ideas and from which lessons can be learned and applied elsewhere. The Routledge International Handbook of Island Studies is a global research-based and pluri-disciplinary overview of the study of islands. Its chapters deal with the contribution of islands to literature, social science, and natural science, as well as other applied areas of inquiry. The collated expertise of interdisciplinary and international scholars offers unique insights: individual chapters dwell on geomorphology, zoology, and evolutionary biology, the history, sociology, economics, and politics of island communities, tourism, wellbeing, and migration, as well as island branding, resilience, and commoning. The text also offers pioneering forays into the study of islands that are cities along rivers or artificial constructions. This insightful Handbook will appeal to geographers, environmentalists, sociologists, political scientists, and one hopes, some of the 600 million or so people who live on islands or are interested in the rich dynamics of islands and island life.
