**The Sense of Style** Steven Pinker, 2015-09-22 Pinker has a lot of ideas and sometimes controversial opinions about writing and in this entertaining and instructive book he rethinks the usage guide for the 21st century Don't blame the internet he says good writing has always been hard It requires imagination taking pleasure in reading overcoming the difficult we all have in imagining what it's like to not know something we do know Publisher information **Writing Science** Joshua Schimel, 2012-01-26 This book takes an integrated approach using the principles of story structure to discuss every aspect of successful science writing from the overall structure of a paper or proposal to individual sections paragraphs sentences and words It begins by building core arguments analyzing why some stories are engaging and memorable while others are quickly forgotten and proceeds to the elements of story structure showing how the structures scientists and researchers use in papers and proposals fit into classical models The book targets the internal structure of a paper explaining how to write clear and professional sections paragraphs and sentences in a way that is clear and compelling **A Counselor's Guide to Examining and Preparing Witnesses in International Arbitration** Ragnar Harbst, 2015-10-20 Mastering the art of witness examination is essential in order to prevail in international arbitration Lawyers acting as counsel in arbitration know that witness evidence stands out from the plethora of documentary evidence in terms of uniqueness and authenticity A vivid first hand live account of the events in issue exerts a strong influence on the arbitrators and a handful of memorable testimonies can outweigh an avalanche of documents This book shows how such mastery in the art of witness examination is accomplished In the majority of today's international arbitrations witness examination is modeled around the common law

practice of lawyer led questioning Arbitration practitioners are therefore more and more expected to take charge of the examination process Drawing on the principles of the art of advocacy in the common law tradition this persuasive and highly engaging book sets out in great detail the practical techniques applicable to the use of witnesses in arbitration The author describes such elements of witness evidence as the following differences between common law and civil law systems in regard to taking witness evidence techniques for interviewing witnesses and preparing witness statements question techniques for direct examination and cross examination methods for developing forceful cross examinations the boundaries of witness preparation preparing the witness for direct examination and cross examination psychological risks of witness preparation guidelines for witnesses during direct examination and cross examination All topics are illustrated by way of practical examples which also serve as a pool of useful model phrases and expressions Practical appendices include ready to adapt sample documents such as a procedural questionnaire procedural rules and a witness statement The book will be particularly useful for arbitration practitioners who have had little exposure to the adversarial approach to evidence and who wish to learn the ropes of lawyer led witness examination and preparation However any practitioner stands to gain from applying the book s practical guidance and the author s wise counsel

Telling Stories Ben Rinzler, 2009-05-27 From System Designers to Top Management Everyone loves a good story Once upon a time it was well understood that stories teach better than plain facts Why then are most software requirements documents a baffling hodge podge of diagrams data dictionaries and bullet points held together by little more than a name and a staple Telling Stories teaches you to combine proven standards of requirements analysis with the most ancient and effective tool for sharing information the narrative Telling Stories simplifies and refines the classic methods of Structured Analysis providing organization design and old fashioned writing advice Whether you re just getting started or an experienced requirements writer Telling Stories can help you turn dull detailed material into an engaging logical and readable story a story that can make the difference for your project and your career Learn why readers believe and remember what they learn from stories Work with team members to gather content tell their stories and win their support Use stories to find every requirement Create diagrams that almost tell the story on their own while looking clear and professional Explain everything important about a process Use precise language to remove the ambiguity from requirements Write a forceful executive summary that stands on its own and sells a project to senior management Summarize often to keep the reader focused on key issues Structure the document so every part has a clear place and purpose

*Contemporary Composition Studies* Edith Babin, Kimberly Harrison, 1999-12-30 Composition studies is a rapidly growing and constantly changing field At present however graduate students new to the field and writing teachers who want to make new connections between theory and practice have little choice of current reference works that define key terms in composition studies and provide information about the scholars and researchers who have shaped and are shaping the discipline This book supplies this information in an easily accessible format and places both

scholars and terms in the context of the field's development. Included are alphabetically arranged entries for 108 individuals who have developed the field and 128 terms central to the discipline. The first part of the book provides entries for leaders in composition studies. Each entry identifies the areas in which the scholar has contributed most influentially to the field and provides both a chronological overview of the person's contributions and a bibliography of representative works. The second part includes entries for terms that are problematic both for newcomers and for those already familiar with the discipline. The entries for the terms show how the disciplinary context has shaped the ways in which they have been used. The entries also indicate how established thinkers in composition studies and other disciplines have explained or defined the terms, provide examples of the terms in context, and list scholars often associated with them. An appendix includes entries for scholars from other disciplines who have contributed to the field.
