

A man in a tan jumpsuit is working on a car in a modern workshop. He is leaning over the open hood of a car, using a laptop that is placed on the engine. The workshop has a high ceiling with exposed beams and lights. In the background, there are shelves with various tools and equipment, and a red tool chest. The overall scene is a professional automotive repair environment.

scenes workplace control mechanisms which prevent workers from defending themselves from exploitation For most
economists labor is simply a commodity bought and sold in markets like any other and what happens after that is not their
concern Individual prospective workers offer their services to individual employers each acting solely out of self interest and
facing each other as equals The forces of demand and supply operate so that there is neither a shortage nor a surplus of
labor and in theory workers and bosses achieve their respective ends Michael D Yates in *Work Work Work Labor Alienation*
and *Class Struggle* offers a vastly different take on the nature of the labor market This book reveals the raw truth The labor
market is in fact a mere veil over the exploitation of workers Peek behind it and we clearly see the extraction by a small but
powerful class of productive property owning capitalists of a surplus from a much larger and propertyless class of wage
laborers *Work Work Work* offers us a glimpse into the mechanisms critical to this subterfuge In every workplace capital
implements a comprehensive set of control mechanisms to constrain those who toil from defending themselves against
exploitation These include everything from the herding of workers into factories to the extreme forms of surveillance utilized
by today s captains of industry like the Walton family of the Walmart empire and Jeff Bezos In these strikingly lucid and
passionately written chapters Yates explains the reality of labor markets the nature of work in capitalist societies and the
nature and necessity of class struggle which alone can bring exploitation and the system of control that makes it possible to a
