Subjectification Intersubjectification And Grammaticalization Topics In English Linguistics:

Subjectification, Intersubjectification and Grammaticalization Kristin Davidse, Lieven Vandelanotte, H. Cuyckens, 2010 The future of English linguistics as envisaged by the editors of Topics in English Linguistics lies in empirical studies which integrate work in English linguistics into general and theoretical linguistics on the one hand and comparative linguistics on the other The TiEL series features volumes that present interesting new data and analyses and above all fresh approaches that contribute to the overall aim of the series which is to further outstanding research in English linguistics **The Directionality of (Inter)subjectification in the English Noun Phrase** Lobke Ghesquière, 2014-10-10 The book investigates pathways of inter subjectification followed by prenominal elements in the English Noun Phrase by tracing the development of identifying noun intensifying and subjective compound uses By means of in depth corpus study the assumed unidirectionality of inter subjectification in the NP is verified and refined **Intersubjectivity and Intersubjectification in Grammar and Discourse** Lieselotte Brems, Lobke Ghesquière, Freek Van de Velde, 2014-08-15 Recent years saw a growing interest in the study of subjectivity as the linguistic expression of speaker involvement Intersubjectivity defined by Traugott as the linguistic expression of a speaker writer's attention to the hearer reader on the other hand has so far received little explicit attention in its own right let alone systematic definition and operationalization Intersubjectivity and seemingly related notions such as interpersonal meaning appraisal stance and metadiscourse frequently appear in cognitive functional accounts as well as historical and more applied approaches These domains offer partly conflicting uses of intersubjectivity differ in the overall scope of the concept and the phenomena it may cover This book brings together contributions from a variety of different approaches with the aim of disentangling the current web of intertwined notions of intersubjectivity Rather than focusing on the potentially conflicting views the volume aspires to resolve some of the conceptual puzzle by cross fertilization between the different views and spark discussion on how to operationalize intersubjectivity in linguistic research Originally published in English Text Construction 5 1 2012 Topics in Subjectification and Modalization Bert Cornillie, 2006 As of Volume 9 1994 95 John Benjamins Publishing Company is the official publisher of the Belgian Journal of Linguistics the annual publication of the Linguistic Society of Belgium Each volume is topical and includes selected papers from the international meetings organised by the LSB This volume on subjectification and modalization sheds new light on two kinds of shifts i the shift from originally lexical reading toward propositional or procedural ones and ii the shift from direct speech to various forms of indirect speech The papers of this volume not only corroborate many of the assumptions and hypotheses on semantic and syntactic change made in the literature but also uncover the underlying principles that motivate these processes Five papers discuss the patterns lying behind the grammaticalization and subjectification of adverbs and verbs Three papers dwell on different ways of reporting or distancing the speaker's own or someone else's discourse and address the issue of how the speaker can make use of tense to modalize

Daniel Olmen,Hubert Cuyckens,Lobke Ghesquière,2016-12-19 This volume advances our understanding of two highly debated aspects of grammaticalization its relation to inter subjectification and its directionality These aspects are studied with respect to such phenomena as auxiliaries discourse markers conjunctions prepositions and pronouns Bringing together a wide range of languages the collection provides insight into the crucial dimensions of grammaticalization research

English Adjectives of Comparison Tine Breban,2010-07-19 The book is concerned with a hitherto underresearched grammaticalization process the development from quality attributing adjective to determiner in the English noun phrase It takes a bottom up approach based on extensive synchronic and diachronic corpus studies of six English adjectives of comparison other different same identical similar and comparable Their functional diversity in current English is proposed to constitute a case of layering representing the original descriptive use which expresses how like unlike each other entities are and a range of grammaticalized referential uses which contribute to the identification and or quantification of the entities denoted by the NP Diachronic and comparative data material is invoked to verify and further develop the grammaticalization hypothesis The development of adjectives of comparison involves several key concepts identified in the literature Crucially it is described as a case of textual intersubjectification driven by the optimalization of recipient design The actual grammaticalization paths are diverse and are characterized by lexical as well as structural persistence i e the same lexical meaning develops into different grammatical functions in different syntagmatic configurations In order to define the NP as a locus of diachronic change this study offers a new angle on the description of adjectives and the modelling of NP structure It advocates the abandonment of the traditional class based model in favour of a radically functional one in which functions are defined in terms of prototypicality so as to allow for gradience between and within them The described grammaticalization processes involve developments from prototypical lexical to grammatical reference related use within the adjectival category which can be the starting point of further gradual change to determiners The traditional relation between classes and positions is envisaged as a correspondence between functional and syntactic zones The change in form concomitant with grammaticalization in the NP is argued to consist of the reconfiguration of structural combinatorics and progressive leftward movement The book is of interest to linguistic researchers and graduate students in linguistics who focus their attention on grammaticalization and subjectification the functional description of adjectives questions of deixis and theoretical issues relating to nominal reference **Virittäjä** ,2005 **Grammaticalization, Pragmaticalization, and**
