Subjective Probability Richard Jeffrey,2004-04-12 Sample Text    **Subjective Probability** Richard Jeffrey,2004-04-12 A concise survey of basic probability theory from a thoroughly subjective point of view    **Induction and Deduction in the Sciences** Friedrich Stadler,2004-04-30 The articles in this volume deal with the main inferential methods that can be applied to different kinds of experimental evidence These contributions accompanied with critical comments by renowned scholars in the field of philosophy of science aim at removing the traditional opposition between inductivists and deductivists They explore the different methods of explanation and justification in the sciences in different contexts and with different objectives The volume contains contributions on methods of the sciences especially on induction deduction abduction laws probability and explanation ranging from logic mathematics natural to the social sciences They present a highly topical pluralist re evaluation of methodological and foundational procedures and reasoning e g focusing in Bayesianism and Artificial Intelligence They document the second international conference in Vienna on Induction and Deduction in the Sciences as part of the Scientific Network on Historical and Contemporary Perspectives of Philosophy of Science in Europe funded by the European Science Foundation ESF

## **Theories of Scientific Method** Robert Nola,Howard

Sankey,2014-12-18 What is it to be scientific Is there such a thing as scientific method And if so how might such methods be justified Robert Nola and Howard Sankey seek to provide answers to these fundamental questions in their exploration of the major recent theories of scientific method Although for many scientists their understanding of method is something they just pick up in the course of being trained Nola and Sankey argue that it is possible to be explicit about what this tacit understanding of method is rather than leave it as some unfathomable mystery They robustly defend the idea that there is such a thing as scientific method and show how this might be legitimated This book begins with the question of what methodology might mean and explores the notions of values rules and principles before investigating how methodologists have sought to show that our scientific methods are rational Part 2 of this book sets out some principles of inductive method and examines its alternatives including abduction IBE and hypothetico deductivism Part 3 introduces probabilistic modes of reasoning particularly Bayesianism in its various guises and shows how it is able to give an account of many of the values and rules of method Part 4 considers the ideas of philosophers who have proposed distinctive theories of method such as Popper Lakatos Kuhn and Feyerabend and Part 5 continues this theme by considering philosophers who have proposed naturalised theories of method such as Quine Laudan and Rescher This book offers readers a comprehensive introduction to the idea of scientific method and a wide ranging discussion of how historians of science philosophers of science and scientists have grappled with the question over the last fifty years    **Perspectives on Logics for Data-driven Reasoning** Hykel Hosni,Jürgen Landes,2025-01-21 This book calls for a rethinking of logic as the core methodological tool for scientific reasoning in the context of a steadily increasing emphasis on data centered science To do so it provides a state of the art

presentation of the role logic can have in making the most of the current opportunities while making explicit the key challenges opened up by the data driven age of scientific research Particular attention is given to the following four core fields and applications Reasoning with correlations medical life science applications logics for statistical inference machine learning and societal applications thereof reasoning with evidence defining good evidence causal reasoning forensic reasoning The book collects contributions from key logicians methodologists and scientists This multidisciplinary perspective benefits both scientists and logicians interested in data driven science Scientists are introduced to logics that go beyond classical and thus are applicable to reasoning with data Logicians have a chance to focus on the potential applications of their methods and techniques to pressing scientific problems This book is therefore of interest to scientists and logicians working on data centered science

Cambridge and Vienna Maria C. Galavotti,2006-07-10 The Institute Vienna Circle held a conference in Vienna in 2003 Cambridge and Vienna Frank P Ramsey and the Vienna Circle to commemorate the philosophical and scientific work of Frank Plumpton Ramsey 1903 1930 This Ramsey conference provided not only historical and biographical perspectives on one of the most gifted thinkers of the Twentieth Century but also new impulses for further research on at least some of the topics pioneered by Ramsey whose interest and potential are greater than ever Ramsey did pioneering work in several fields practitioners of which rarely know of his important work in other fields philosophy of logic and theory of language foundations of mathematics mathematics probability theory methodology of science philosophy of psychology and economics There was a focus on the one topic which was of strongest mutual concern to Ramsey and the Vienna Circle namely the question of foundations of mathematics in particular the status of logicism Although the major scientific connection linking Ramsey with Austria is his work on logic to which the Vienna Circle dedicated several meetings certainly the connection which is of greater general interest concerns Ramsey s visits and discussions with Wittgenstein Ramsey was the only important thinker to actually visit Wittgenstein during his school teaching career in Puchberg and Ottenthal in the 1920s in Lower Austria and later Ramsey was instrumental in getting Wittgenstein positions at Cambridge
