**Modern Marine Internal Combustion Engines** Ievgen Bilousov, Mykola Bulgakov, Volodymyr Savchuk, 2020-06-30 This book offers a comprehensive and timely overview of internal combustion engines for use in marine environments. It reviews the development of modern four stroke marine engines gas and gas diesel engines and low speed two stroke crosshead engines describing their application areas and providing readers with a useful snapshot of their technical features e.g. their dimensions, weights, cylinder arrangements, cylinder capabilities, rotation speeds and exhaust gas temperatures. For each marine engine information is provided on the manufacturer historical background, development and technical characteristics of the manufacturer's most popular models and detailed drawings of the engine depicting its main design features. This book offers a unique self-contained reference guide for engineers and professionals involved in shipbuilding. At the same time it is intended to support students at maritime academies and university students in naval architecture, marine engineering with their design projects at both master and graduate levels thus filling an important gap in the literature.

**Modern Marine Engineer's Manual** Everett C. Hunt, 2002 This manual first published in 1943 has been indispensable to ships engineers for generations. The third edition revised and updated by a team of marine engineers professors follows in the venerable style of its predecessors. Text relating to obsolete equipment has been eliminated, information on systems that are still current has been updated and new material has been added to reflect innovations in equipment and operative practices. Extensive coverage on the newest medium speed diesel engine has been added to the text. Environmental concerns have been recognized with a section on engine exhaust emissions and information about new refrigerants and the maintenance of refrigeration systems. New equipment for trash handling, sewage processing, bilge water discharge and incineration are discussed with reference to international regulations. Ship trial procedures and the new equipment used in trial data collection are presented in detail.

**Modern Marine Engineer's Manual** Alan Osbourne, 1965 Volume II of the manual that has been absolutely indispensable to the ship's engineer for over forty years was completely updated by a team of practicing marine engineers in 1991. Chapters on obsolete equipment were deleted, those on systems that are still current were updated and new chapters were written to cover the innovations in materials, machines and operating practices that evolved recently.

**Pounder's Marine Diesel Engines** C. T. Wilbur, D. A. Wight, 2016-02-25 Pounder's Marine Diesel Engines Sixth Edition focuses on developments in diesel engines. The book first discusses theory and general principles. Theoretical heat cycle, practical cycles, thermal and mechanical efficiency, working cycles, fuel consumption, vibration and horsepower are considered. The text takes a look at engine selection and performance including direct and indirect drive, maximum rating, exhaust temperatures, derating, mean effective pressures, fuel coefficient, propeller performance and power build up. The book also examines pressure charging. Matching of turboblowers, blower surge, turbocharger types, constant pressure method, impulse turbocharging method and scavenging are discussed. The text describes fuel injection, Sulzer, MAN

and Burmeister and Wain engines The selection also considers Mitsubishi GMT and Doxford engines The text then focuses on fuels and fuel chemistry operation monitoring and maintenance significant operating problems and engine installation Engine seatings and alignment reaction measurements crankcase explosions main engine crankshaft defects bearings fatigue and overhauling and maintenance are discussed The book is a good source of information for readers wanting to study diesel engines **Marine Technology III** T. Graczyk, Tadeusz Jastrzębski, C. A.
