Practical cyber security ,2023-11-24 The best defense against cyber threats is between your chair and your computer keyboard Every day you are subjected to cyber threats of all kinds without you realizing it unauthorized control systems fraud attempts theft of accounts and personal data extortion attempts and blackmail of all kinds are just some examples of the risks that you run unknowingly With the advance of technologies more and more people spend a large part of their time on the net in one way or another providing personal and sensitive data which if they fell into the wrong hands could lead to ruining lives but not virtual ones the real ones for example yours In this second book I will try to analyze the situation of computer security to make you aware of all kinds of dangers that threaten your life so that you know the enemy you will face In a simple way and without too many useless technicalities I will take you with me on a journey to discover the practical systems for defending your personal data with free means that you can use immediately in everyday life until you create a new awareness within you that can serve to identify the danger face it and defeat it When you have finished reading it you will perhaps feel stunned sometimes horrified by the things that have happened certainly amazed by how many aspects of the world of security and above all of the implications they can have on your real life you had never taken into consideration A text suitable for everyone therefore for the understanding of which you will only need a little curiosity and a great desire to learn If you like this work leave me a positive comment and let me understand that you want me to continue writing quality content I put my heart into it and I hope you put yours into reading it Enjoy the reading Stefano Ravagni
