## **The Theological Origins Of Modernity:**

*The Theological Origins of Modernity* Michael Allen Gillespie, 2008-09-15 Exposing the religious roots of our ostensibly godless age Michael Allen Gillespie reveals in this landmark study that modernity is much less secular than conventional wisdom suggests Taking as his starting point the collapse of the medieval world Gillespie argues that from the very beginning moderns sought not to eliminate religion but to support a new view of religion and its place in human life He goes on to explore the ideas of such figures as William of Ockham Petrarch Erasmus Luther Descartes and Hobbes showing that modernity is best understood as a series of attempts to formulate a new and coherent metaphysics or theology Bringing the history of political thought up to date and situating it against the backdrop of contemporary events Gillespie's analyses provide us a way to begin to have conversations with the Islamic world about what is perhaps the central question within each of the three monotheistic religions if God is omnipotent then what is the place of human freedom Joshua Mitchell Georgetown University

*Revising Modernity* J. Henry Messinger, 2011 Charles Taylor in *A Secular Age* and Michael Gillespie in *The Theological Origins of Modernity* address the transition to European modernity through an analysis of changes in the ontological conditions of making sense and the relative contributions of science and religion to the changes in those conditions Making sense of the world is a key arena in the contest between science and religion Taylor and Gillespie both deny that science ever made sense of the world independently of religion For Taylor science never made sense of the world and did not play a central role in the transition to modernity For Gillespie any sense that science made came from its being founded in and a continuation of medieval nominalist theology In both of their arguments Descartes represents modern science and their analysis is based on an ontology to which Descartes was one subscriber Newton proposed a different ontology and it is Newton's ontological articulation which provides the conditions for making modern sense and the foundation for elements of modernity to which Taylor and Gillespie attend Among these are the centrality of time to the modern self and the nation as described by Benedict Anderson For Taylor in addition to Anderson's national community the public sphere the market economy and the polity of popular sovereignty can only develop in the simultaneity of homogeneous time that arises with a changed understanding of time However it is Newton not Descartes who makes homogeneous time the location of order to provide a coherent universe which can be the basis of these elements of modernity Hobbes Descartes and their contemporaries and close predecessors possess all or most of the elements of modernity but without the Newtonian foundation in time these do not cohere or form the basis of making sense Neither Taylor nor Gillespie address modern science in its role in the development of secular modernity Taylor includes Newton but does not differentiate him importantly from Descartes Gillespie's story is complete with Descartes and Hobbes This misses the redefinition of nature which takes place with Newton Looking to the Newtonian articulation of nature offers a better explanation of the development of the elements of modernity which Taylor takes as central and counters the relationship which Gillespie claims for science and
