A series of clues leads her to the muddy river banks where clouds of fireflies dance among the cypress knees and cattails each evening at twilight. The fireflies are beautiful and mysterious and they take her on a magical journey through time where Larissa learns secrets about her family's tragic past deadly curse ridden secrets that could harm the future of her family as she knows it. It soon becomes clear that it is up to Larissa to prevent history from repeating itself and a fatal tragedy from striking the people she loves. With her signature lyricism Kimberley Griffiths Little weaves a thrilling tale filled with family secrets haunting mystery and dangerous adventure.

Fireflies Joanne Ryder, 1977 Describes the physical characteristics of a firefly from the time it is a glowworm until adulthood  , 1995 **Uncultivated** Andy Brennan, 2019-06-17 The best wine book I read this year was not about wine Eric Asimov New York Times Today food is being reconsidered It's a front and center topic in everything from politics to art from science to economics We know now that leaving food to government and industry specialists was one of the twentieth century's greatest mistakes The question is where do we go from here Author Andy Brennan describes uncultivation as a process It involves exploring the wild recognizing that much of nature is omitted from our conventional ways of seeing and doing things our cultivations and realizing the advantages to embracing what we've somehow forgotten or ignored For most of us this process can be difficult like swimming against the strong current of our modern culture The hero of this book is the wild apple Uncultivated follows Brennan's twenty four year history with naturalized trees and shows how they have guided him toward successes in agriculture in the art of cider making and in creating a small farm business The book contains useful information relevant to those particular fields but is designed to connect the wild to a far greater audience skillfully blending cultural criticism with a food activist's agenda Apples rank among the most manipulated crops in the world because not only do farmers want perfect fruit they also assume the health of the tree depends on human intervention Yet wild trees live all around us and left to their own devices they achieve different forms of success that modernity fails to apprehend Andy Brennan learned of the health and taste advantages of such trees and by emulating nature

in his orchard and in his cider he has also enjoyed environmental and financial benefits None of this would be possible by following today's prevailing winds of apple cultivation. In all fields our cultural perspective is limited by a parallel proclivity. It's not just agriculture we all must fight tendencies toward specialization efficiency linear thought and predetermined growth. We have cultivated those tendencies at the exclusion of nature's full range. If Uncultivated is about faith in nature and the power it has to deliver us from our own mistakes then wild apple trees have already shown us the way. The book for cider lovers New York Times Andy Brennan is a stubborn thoughtful original and his apple memoir is powered by inspiring verve and irreverence. Loving apples or cider is not a prerequisite for loving this book. All that is needed is the willingness to follow a vibrant narrative voice driven by the pursuit of dreams Alice Feiring author of Naked Wine and For the Love of Wine.

Stepping Stones ,1927 **Breath** Martha Mason,2010-07-01 After contracting polio as a young girl Martha Mason of tiny Lattimore North Carolina lived a record sixty one of her seventy one years in an iron lung until her death in 2009 but she never let the 800 pound cylinder define her. The subject of a documentary film an NPR feature an ABC News piece and a widely syndicated New York Times obituary Martha enjoyed life and people. From within her iron lung she graduated first in her class in high school and at Wake Forest University and was elected to Phi Beta Kappa. She was determined to be a writer and with her devoted mother taking dictation she became a journalist but had to give up her career when her father became ill. Still Martha created for herself a vast and radiant world holding dinner parties with the table pushed right up to her iron lung voraciously reading running her own household and caring for her mother when she became ill with Alzheimer's and increasingly abusive to Martha. When voice activated computers became available Martha wrote *Breath* in part as a tribute to her mother. This book is her story writes Anne Rivers Siddons in her preface told in the rich words of a born writer. That she told it is a gift to everyone who will read it. That she told it is also as near to a miracle as most are likely to encounter.
