The Philosophical Foundations of Environmental Law Sean Coyle,Karen Morrow,2004-04-22 Legal regulation of the environment is often construed as a collection of legislated responses to the problems of modern living Treated as such environmental law refers not to a body of distinctive juristic ideas such as one might find in contract law or tort but to a body of black letter rules out of which a distinct jurisprudence might grow This book challenges the accepted view by arguing that environmental law must be seen not as a mere instrument of social policy but as a historical product of surprising antiquity and considerable sophistication Environmental law it is argued is underpinned by a series of tenets concerning the relationship of human beings to the natural world through the acquisition and use of property By tracing these ideas to their roots in the political philosophy of the seventeenth century and their reception into the early law of

nuisance this book seeks to overturn the perception that environmental law's philosophical significance is confined to questions about the extent to which a state should pursue collective well being and public health through deliberate manipulation and restriction of private property rights. Through a close re-examination of both early and modern statutes and cases this book concludes that far from being intelligible in exclusively instrumental terms environmental law must be understood as the product of sustained reflection upon fundamental moral questions concerning the relationship between property rights and nature.

Dodging bullets and hitmen and avoiding ancient booby traps the Blackstone just chalk it up to another day on the job. Join the Blackstones as they cruise the Nile thunder their way through ancient tombs fight their way through the dusty streets of Cairo and rappel into danger searching for The Lost Tomb.

**In the Name of Elijah Muhammad** Mattias Gardell, 1996-09-26 In the Name of Elijah Muhammad tells the story of the Nation of Islam its rise in northern inner city ghettos during the Great Depression through its decline following the death of Elijah Muhammad in 1975 to its rejuvenation under the leadership of Louis Farrakhan. Mattias Gardell sets this story within the context of African American social history the legacy of black nationalism and the long but hidden Islamic presence in North America. He presents with insight and balance a detailed view of one of the most controversial yet least explored organizations in the United States and its current leader. Beginning with Master Farad Muhammad believed to be God in Person Gardell examines the origins of the Nation. His research on the period of Elijah Muhammad's long leadership draws on previously unreleased FBI files that reveal a clear picture of the bureau's attempts to neutralize the Nation of Islam. In addition they shed new light on the circumstances surrounding the murder of Malcolm X. With the main part of the book focused on the fortunes of the Nation after Elijah Muhammad's death Gardell then turns to the figure of Minister Farrakhan. From his emergence as the dominant voice of the radical black Islamic community to his leadership of the Million Man March Farrakhan has often been portrayed as a demagogue bigot racist and anti Semite. Gardell balances the media's view of the Nation and Farrakhan with the Nation's own views and with the perspectives of the black community in which the organization actively works. His investigation based on field research taped lectures and interviews leads to the fullest account yet of the Nation of Islam's ideology and theology and its complicated relations with mainstream Islam the black church the Jewish community extremist white nationalists and the urban culture of black American youth particularly the hip hop movement and gangs.

archaeologists are now piecing together a new and far more complex picture of the human occupation of this country over the last 1000 years Until then it was popularly believed that New Zealand had in the past been settled by two waves of non European colonisers It was commonly thought that the Maoris the Polynesians who inhabited the country at the time of Cook had been preceded by a darker possibly Melanesian and more primitive race called Morioris They had been supplanted by

the Maoris who had arrived in a Great Fleet from their ancestral homeland of Hawaiki some time in the fourteenth century Today we know this version of events to be wrong a myth promulgated by Pakeha researchers at the beginning of the century Instead we now realise that this country was probably first settled by Polynesians about 1000 years ago From this founding
