*When Science Meets Religion* Ian G. Barbour, 2000-01-01 Over the centuries scientists theologians and the general public share many questions about the implications of scientific discoveries for classical religious ideas Trained both as a physicist and a theologian Ian Barbour is qualified to examine the relationship between religion and science It is the sum of all he has learned and taught in his career He explores creation and the big bang quantum physics and ultimate reality evolution and continuing creation genetics and human nature God and nature as well as numerous other topics The book covers all the elements likely to be included in the syllabus of a university course **WHEN SCIENCE MEETS RELIGION**. BARBOUR IAN., 2013

**When Science Meets Religion** Ian G. Barbour, 2013-02-05 For centuries scientists theologians and the general public have debated the question what impact should scientific discoveries have on religion The argument has been so heated at times that some scientists like Galileo were forced to recant their conclusions by Church authorities In *When Science Meets Religion* nuclear physicist and theologian Ian Barbour presents a clear contemporary introduction to the essential issues ideas and solutions in the relationship between religion and science Barbour who was awarded the 1999 Templeton Prize for Progress in Religion for his pioneering role in advancing the study of religion and science addresses creation and the Big Bang quantum physics and ultimate reality evolution and continuing creation and many other fascinating topics that cross the boundary between laboratory and pulpit Ian Barbour is Professor Emeritus of Physics and Religion at Carleton College Northfield Minn He was named the winner of 1999 Templeton Prize for Progress in Religion for his pioneering role in establishing the study of religion and science He donated the 1 42 million prize to the Berkeley Center for the Study of Theology and Science and to Carleton College He is the author of many books including *Religion and Science Ethics in an Age of Technology and Religion in an Age of Science* No surer and fairer guide to the proliferating literature on the relation of science and religion can be found than Ian Barbour Arthur Peacocke Oxford University author of *From DNA to Dean Reflections Explorations of a Priest Scientist*

**Philosophy Culture and Vision: African Perspectives** Gyekye, Kwame, 2014-05-08 Believing that the intellectual enterprise called philosophy is essentially a part of the cultural as well as historical experience of a people that the concepts and problems that occupy the attention of philosophers placed in different cultural spaces or historical times generally derive directly from those spaces and times and that philosophy in turn has been most relevant to the development of human cultures the Ghanaian philosopher Kwame Gyekye gives reflective attention in this book to some of the concepts and problems that in his view feature most prominently in the contemporary African cultural social political and moral experience Such concepts and problems include the following political legitimacy development culture and the pursuit of science and technology political corruption democracy representation and the politics of inclusion the status of cultural values in national orientation understanding globalization and others It is these topics that are covered in the essays collected in this book The unrelenting pursuit of the speculative activity by the philosopher in most

cases eventuates in normative proposals these normative proposals often embody a vision a vision of an ideal human society in terms of its values politics and culture Vision understood here has human not supernatural or divine origination and involvement and requires action by human beings in order for it to come into reality A vision may derive from sustained critical evaluation of a culture or some elements of it Gyekye attempts an articulation of the visions of the essays contained in the book Even though philosophical ideas and concerns are originally inspired by and worked out in a cultural milieu it does not necessarily follow Gyekye strongly believes that the relevance of those ideas and insights is to be tethered to the cultures that produced them For more often than not the relevance of those ideas or at least some of them transcends the confines of their own times and cultures and can be appreciated by other societies or cultures or generational epochs This trans cultural or trans epochal or meta contextual appeal or attraction of philosophical ideas and insights spawned by a particular culture or cluster of cultures or in specific historical times is to be put down to our common human nature including our basic human desires and aspirations Thus most of the essays published here should be of interest to the global community i e to cultures and societies beyond the African *Reading Richard Dawkins* Gary Keogh, 2014 Theological reactions to the rise of the new atheist movement have largely been critically hostile or defensively deployed apologetics to shore up the faith against attack Gary Keogh contends that focusing on scholarly material that is inherently agreeable to theology will not suffice in the context of modern academia Theology needs to test its boundaries and venture into dialogue with those with antithetical positions Engaging Richard Dawkins as the embodiment of such a position illustrates how such dialogue may offer new perspectives on classical theological problems such as the relationship of science and religion the existence of God creation natural suffering and theodicy Keogh demonstrates how a dialogical paradigm may take shape rather than merely discussing it as a theoretical framework A dialogue between such opposing hermeneutics may provide a new paradigm of theological scholarship one which is up to the task of facing its critics in the public and pluralistic context of modern academia

**Reexamining Academic Freedom in Religiously Affiliated Universities** Kenneth Garcia, 2016-12-21 Kenneth Garcia presents an edited collection of papers from the 2015 conference on academic freedom at religiously affiliated universities held at the University of Notre Dame These essays reexamine the secular principle of academic freedom and discuss how a theological understanding might build on and further develop it The year 2015 marked the 100th anniversary of the founding of the American Association of University Professors AAUP the leading advocate of academic freedom in America In October 2015 the University of Notre Dame convened a group of prominent scholars to consider how the concept and practice of academic freedom might evolve The premise behind the conference was that the current conventional understandings of academic freedom are primarily secular and therefore not yet complete The goal was to consider alternative understandings in light of theological insight Theological insight in this context refers to an awareness that there is a surplus of knowledge and meaning to reality that transcends what can be known through ordinary disciplinary methods of inquiry especially those

that are quantitative or empirical Essays in this volume discuss how in light of the fact that findings in many fields hint at connections to a greater whole scholars in any academic field should be free to pursue those connections Moreover there are religious traditions that can help inform those connections     **Theologies of Creation** Thomas Jay Oord,2014-10-02

Humans have long wondered about the origin of the universe And such questions are especially alive today as physicists offer metaphysical theories to account for the emergence of creation Theists have attributed the universe s origin to divine activity and many have said God created something from absolute nothingness The venerable doctrine of *creatio ex nihilo* especially emphasizes God s initial creating activity Some contributors to this book explore new reasons *creatio ex nihilo* should continue to be embraced today But other contributors question the viability of creation from nothing and offer alternative initial creation options in its place These new alternatives explore a variety of options in light of recent scientific work new biblical scholarship and both new and old theological traditions     **Nature and Time** Dong In Baek,2024-12-30 Unveil the intricate tapestry of faith and reason in Nature and Time Integrative Dialogues in History and Theology This insightful work bridges the gap between traditional Christian thought and contemporary scientific understanding Delving deep into the evolving role of natural theology it explores how human reason and empirical observation intertwine with divine revelation

From the hierarchical dance between natural and revealed theology to the pressing political and ecological challenges of our time this book offers a fresh lens through which to view the divine in the modern world Journey through philosophical perspectives on time understand divine action in new dimensions and grapple with the global struggle against oppression all while discovering the enduring relevance of natural theology By weaving together insights from ecology cosmology and neuroscience it fosters a dynamic dialogue that enriches both science and spirituality Whether a theologian seeking depth a scientist exploring beyond the empirical or a curious mind yearning for meaning this book invites the reader to a transformative exploration Engage with a framework that not only addresses the complexities of the world but also fosters a deeper understanding of the divine in every aspect of life     **God's Action in Nature's World** Nathan Hallanger,2016-04-22

In 1981 Robert John Russell founded what would become the leading center of research at the interface of science and religion the Center for Theology and the Natural Sciences Throughout its twenty five year history CTNS under Russell s leadership has continued to guide and further the dialogue between science and theology Russell has been an articulate spokesperson in calling for creative mutual interaction between the two fields God s Action in Nature s World brings together sixteen internationally recognized scholars to assess Robert Russell s impact on the discipline of science and religion Focusing on three areas of Russell s work methodology cosmology and divine action in quantum physics this book celebrates Robert John Russell s contribution to the interdisciplinary engagement between the natural sciences and theology     **Science and Religion** Jeff Astley,David Brown,Ann Loades,2004 This reader brings together carefully selected material from a wide range of authors on the relationships between science religion and theology It samples the recent literature on the challenges to

religion posed by both modern physics and evolutionary biology as well as exploring the relationship between scientific and theological approaches Topics include models of interaction between science and religion historical reflections on the conflict thesis scientific and theological methods creation and modern cosmology uncertainty and chaos creationism and evolutionary theory the anthropic principle and design and the challenge of reductionism Contributors include Ian Barbour Michael Behe Richard Dawkins John Habgood Mary Hesse T H Huxley Alister McGrath Arthur Peacocke John Polkinghorne Michael Ruse Keith Ward and Fraser Watts

**Encyclopedia of Science and Religion**, 2003 Publisher description How do the latest medical developments affect our beliefs in faith s healing power Can artificial intelligence compare with human consciousness Are genetic engineers interfering with Nature s work This reference work deals with these questions and others examining the issues and the history associated with the complex relationship between science and religion Articles by scientists of many fields philosophers and thinkers from all the major world religions present a variety of perspectives on the major scientific discoveries of our time and their effects on our religious belief system

**Perspectives on Science and Christian Faith**, 2007 *Fifty Years in Science and Religion* Robert J. Russell,2004 Ian G Barbour is the internationally acknowledged pioneer in the field of science and religion Although public opinion is often swayed by strident voices which attempt to place science and religion in conflict or keep them totally isolated Barbour s voluminous contributions over the past fifty years have carved out a trusted pathway to constructive dialogue and creative mutual interaction between science and religion Fifty Years in Science and Religion brings together nineteen leading scholars in the field to offer an appreciative yet critical assessment of the impact of Barbour s work on science and religion and to point ahead towards future critical areas goals and tasks that await new research and visionary exploration This book includes a unique autobiography by Barbour in which for the first time he shares and reflects on his life and work and a detailed bibliography of Barbour s works Together the authors demonstrate how Barbour s writings and the hundreds of scholars who have now become part of the field have changed the course of intellectual history in the West by making possible and necessary a truly constructive engagement between science and religion in the context of inter religious dialogue and the global human and environmental challenges of our time

**Illusion of Harmony** Taner Edis,2007 Current discussions in the West on the relation of science and religion focus mainly on science's uneasy relationship with the traditional Judeo Christian view of life But a parallel controversy exists in the Muslim world regarding ways to integrate science with Islam As physicist Taner Edis shows in this fascinating glimpse into contemporary Muslim culture a good deal of popular writing in Muslim societies attempts to address such perplexing questions as Is Islam a scientific religion Were the discoveries of modern science foreshadowed in the Quran Are intelligent design conjectures more appealing to the Muslim perspective than Darwinian explanations Edis examines the range of Muslim thinking about science and Islam from blatantly pseudoscientific fantasies to comparatively sophisticated efforts to Islamize science From the world's strongest creationist movements to bizarre science in the Quran apologetics popular Muslim approaches promote a view of natural science as a mere fact collecting activity that coexists in near perfect harmony with literal minded faith Since Muslims are keenly aware that science and technology have been the keys to Western success they are eager to harness technology to achieve a Muslim version of modernity Yet at the same time they are reluctant to allow science to become independent of religion and are suspicious of Western secularization Edis examines all of these conflicting trends revealing the difficulties facing Muslim societies trying to adapt to the modern technological world His discussions of both the parallels and the differences between Western and Muslim attempts to harmonize science and religion make for a unique and intriguing contribution to this continuing debate *Pious Science* Berna Arslan,2009
