

A scenic landscape photograph showing two rivers converging in a lush, forested valley. The river on the left is a deep, milky turquoise color, while the river on the right is a darker, more vibrant blue. They meet at a rocky point in the center. The surrounding hills and valleys are covered in dense green forests. The sky is overcast and grey. In the foreground, there are some dark, out-of-focus evergreen branches on the left and some dry, light-colored branches at the bottom left.

Where the river meets the ocean - Stories from San Francisco Estuary Peggy W. Lehman, Pedro Morais, Theodore Flynn, Frances P. Wilkerson, 2022-11-02 What is an estuary Where do they occur How do they work Who lives there And why are estuaries important to our planet This collection will answer all of these questions and more Estuaries are places where fresh water from rivers moving downstream from the mountains mixes with salty water moving upstream from the ocean Estuaries thus contain both fresh and salty water habitats places where many kinds of plants and animals can live and grow San Francisco Estuary is the largest estuary on the West Coast of the United States and is home to millions of people plants and animals Our scientists have been studying all aspects of the San Francisco Estuary for nearly 50 years and we have 35 stories to tell about the people plants and animals in the estuary We will tell you horror stories of how tiny poisonous plants and vampire fish kill other fish and we have success stories of how conservation saves the lives of tiny mice in marshes and birds along the Pacific Flyway The Collection of stories is divided into six sections so you can easily find the stories that interest you the most The first section describes the many kinds of habitats in the estuary including rivers shallow bays wetlands and marshes and what makes them a good home for plants animals and people In the second section the water quality scientists will describe how they use boats special instruments and new technology to determine whether the water is healthy for people plants and animals In the third and fourth sections we will tell stories about how plants and animals live in the estuary Microbiologists will describe the tiny microscopic plants and animals that live in the estuary what makes them grow how important they are as food for animals and why they are sometimes poisonous Fish scientists will describe the many kinds of fish in the estuary and how we measure their growth determine where they are what they eat and the ways they use both fresh and saltwater habitats to grow and raise their young In the fifth section scientists will discuss how invasions of plants and animals from outside of the estuary have changed habitats and the survival of native plants and animals Lastly in the sixth section we will share how scientists in the estuary are using new technologies and management actions to control invasions of unwanted plants and animals increase the growth of native plants and animals improve water quality and restore habitats in the estuary

Where Rivers Part Kao Kalia Yang, 2024-03-19 In the 1960s when Kalia's mother Chue was born the US was actively recruiting Hmong Laotians to assist with CIA efforts in Laos's Secret War By the time Chue was a teenager the US had completely vacated Laos and the country erupted into genocidal attacks on the Hmong people who were perceived as traitorous for their involvement Notably from 1964-1973 Laos became victim to the heaviest bombardment by the United States against communist Pathet Lao becoming the most heavily bombed country in history Fearing vengeful soldiers looking to take their lives Chue and her family quickly fled their village for the jungle leaving all that they knew behind Perpetually on the run the family was often on the brink of starvation and death

loomed During this tumultuous period Chue met her husband Bee and unwittingly left her mother behind forever when she escaped to a refugee camp with his family a mistake she would regret for the rest of her life There Chue Bee and their daughters lived in a state of constant fear and hunger until they finally made it to America The determined couple enrolled in high school classes despite being in their late twenties and worked grueling factory jobs to provide for their family yet most who meet Chue know nothing of her extraordinary resilience and traumatic past In *Where Rivers Part* told from her mother's point of view Kao Kalia Yang unveils her mother's epic struggle towards safety and the important undocumented history of a time and place most US readers know nothing about offering insight into America's Secret War in Laos with tenderness and unvarnished clarity In doing so she excavates the plight of many refugees who suffer silently and are often overlooked as one of the essential foundations of this country For readers of *The Wild Swans* by Jung Chang *The Spirit Catches You When You Fall Down* by Anne Fadiman and those who flock to stories about survival during wartime *Where Rivers Part* is not only a personal account of resilience and survival but also a powerful and transporting look into Laos's Secret War and the lived experiences of the Hmong people
