Ai Overview Compare Returns:

Artificial Intelligence in Theory and Practice IV Tharam Dillon, 2015-10-02 This book constitutes the refereed proceedings of the 4th IFIP TC 12 International Conference on Artificial Intelligence IFIP AI 2015 Held as Part of WCC 2015 in Daejeon South Korea in October 2015 The 13 full papers presented were carefully reviewed and selected from 36 submissions The papers are organized in topical sections on artificial intelligence techniques in biomedicine artificial intelligence for knowledge management computational intelligence and algorithms and intelligent decision support systems *Introduction to Parallel Computing* Wesley P. Petersen, Peter Arbenz, 2004 This is a practical student guide to scientific computing on parallel computers working up from a hardware instruction level to shared memory machines and finally to distributed memory machines

Applications of AI and Machine Learning in Finance and Economics Alessia Paccagnini, Maria Iannario, Joerg Osterrieder, Adamaria Perrotta, Fabio Parla, Hanna Kristín Skaftadóttir, 2025-11-19 This Research Topic is in collaboration with the Women in FinTech and AI 2024 conference Extended versions of work presented at the conference are welcome In today's rapidly evolving economic landscape the integration of artificial intelligence AI in finance and economics has become paramount AI fueled by unprecedented computational power and sophisticated algorithms has the potential to revolutionize decision making processes risk management and predictive analytics within the financial sector Its adaptive capabilities and data driven insights contribute to more informed strategies driving efficiency and innovation Moreover the era of big data has ushered in a new paradigm where vast and diverse datasets serve as a cornerstone for informed decision making The intersection of big data and finance allows for a granular understanding of market dynamics customer behavior and economic trends Harnessing the power of big data alongside AI not only empowers financial institutions to navigate complexities but also lays the foundation for sustainable and resilient financial systems in an interconnected global economy We invite researchers and professionals to contribute to a special issue of *Frontiers in Artificial Intelligence* dedicated to the intersection of artificial intelligence and economics and finance This special issue aims to explore cutting edge advancements in various areas including but not limited to Big Data applied to finance natural language processing in economics digital finance and sustainability AI for financial markets and blockchain applications We welcome submissions on a wide range of topics including Big Data applications in finance and economics Natural language processing in economic and financial contexts Digital finance and its implications for sustainability Artificial intelligence in financial markets Blockchain applications in finance Artificial intelligence for peer to peer finance Network analysis in finance Artificial intelligence in Green Finance and Climate Change Behavioral finance

Proceedings of Fourth International Conference on Computing and Communication Networks Akshi Kumar, Abhishek Swaroop, Pancham Shukla, 2025-07-02 This book includes selected peer reviewed papers presented at fourth International Conference on Computing and Communication Networks ICCCN 2024 held at Manchester Metropolitan University UK during 17-18 October 2024 The book covers topics of network and computing

technologies artificial intelligence and machine learning security and privacy communication systems cyber physical systems data analytics cyber security for industry 4.0 and smart and sustainable environmental systems

An Introduction to Bioinformatics Algorithms Neil C. Jones, Pavel A. Pevzner, 2004-08-06 An introductory text that emphasizes the underlying algorithmic ideas that are driving advances in bioinformatics This introductory text offers a clear exposition of the algorithmic principles driving advances in bioinformatics Accessible to students in both biology and computer science it strikes a unique balance between rigorous mathematics and practical techniques emphasizing the ideas underlying algorithms rather than offering a collection of apparently unrelated problems The book introduces biological and algorithmic ideas together linking issues in computer science to biology and thus capturing the interest of students in both subjects It demonstrates that relatively few design techniques can be used to solve a large number of practical problems in biology and presents this material intuitively An Introduction to Bioinformatics Algorithms is one of the first books on bioinformatics that can be used by students at an undergraduate level It includes a dual table of contents organized by algorithmic idea and biological idea discussions of biologically relevant problems including a detailed problem formulation and one or more solutions for each and brief biographical sketches of leading figures in the field These interesting vignettes offer students a glimpse of the inspirations and motivations for real work in bioinformatics making the concepts presented in the text more concrete and the techniques more approachable PowerPoint presentations practical bioinformatics problems sample code diagrams demonstrations and other materials can be found at the Author's website
