Advances in Artificial Intelligence Leila Kosseim, Diana Inkpen, 2012-05-26 This book constitutes the refereed proceedings of the 25th Canadian Conference on Artificial Intelligence Canadian AI 2012 held in Toronto Canada in May 2012 The 23 regular papers 16 short papers and 4 papers from the Graduate Student Symposium presented were carefully reviewed and selected for inclusion in this book The papers cover a broad range of topics presenting original work in all areas of artificial intelligence either theoretical or applied Intelligent Systems and Applications Kohei Arai, Supriya Kapoor, Rahul Bhatia, 2020-08-25 The book Intelligent Systems and Applications Proceedings of the 2020 Intelligent Systems Conference is a remarkable collection of chapters covering a wider range of topics in areas of intelligent systems and artificial intelligence and their applications to the real world The Conference attracted a total of 545 submissions from many academic pioneering researchers scientists industrial engineers students from all around the world These submissions underwent a double blind peer review process Of those 545 submissions 177 submissions have been selected to be included in these proceedings As intelligent systems continue to replace and sometimes outperform human intelligence in decision making processes they have enabled a larger number of problems to be tackled more effectively This branching out of computational intelligence in several directions and use of intelligent systems in everyday applications have created the need for such an international conference which serves as a venue to report on up to the minute innovations and developments This book collects both theory and application based chapters on all aspects of artificial intelligence from classical to intelligent scope We hope that readers find the volume interesting and valuable it provides the state of the art intelligent methods and techniques for solving real world problems along with a vision of the future research Philosophy and Theory of Artificial Intelligence Vincent C. Müller, 2012-08-23 Can we make machines that think and act like humans or other natural intelligent agents The answer to this question depends on how we see ourselves and how we see the machines in question Classical AI and cognitive science had claimed that cognition is computation and can thus be reproduced on other computing machines possibly surpassing the abilities of human intelligence This consensus has now come under threat and the agenda for the philosophy and theory of AI must be set anew re defining the relation between AI and Cognitive Science We can reclaim the original vision of general AI from the technical AI disciplines we can reject classical cognitive science and replace it with a new theory e g embodied or we can try to find new ways to approach AI for example from neuroscience or from systems theory To do this we must go back to the basic questions on computing cognition and ethics for AI The 30 papers in this volume provide cutting edge work from leading researchers that define where we stand and where we should go from here Proceedings of International Conference on Information Technology and Artificial Intelligence Sandeep Kumar, Robin T. Bye, Mukesh Prasad, 2025-12-21 This book presents a collection of high quality peer reviewed research papers from First International Conference on Information Technology and Artificial Intelligence ITAI 2025 organized by Soft

Computing Research Society held in Gurgaon India from January 24-25, 2025. It covers topics such as artificial intelligence, data science, and applications, cybersecurity, internet of things, cloud computing, information retrieval, and knowledge management. **Progressive Computational Intelligence, Information Technology and Networking** Poonam Nandal, Mamta Dahiya, Meeta Singh, Arvind Dagur, Brijesh Kumar, 2025-07-22. *Progressive Computational Intelligence: Information Technology and Networking* presents a rich and diverse collection of cutting-edge research, real-world applications, and innovative methodologies spanning across multiple domains of computer science, artificial intelligence, and emerging technologies. This comprehensive volume brings together different scholarly chapters contributed by researchers, practitioners, and thought leaders from around the globe. The book explores a wide array of topics, including but not limited to machine learning, deep learning, cloud computing, cybersecurity, Internet of Things (IoT), blockchain, natural language processing, image processing, and data analytics. It addresses the practical implementation of technologies in sectors such as healthcare, agriculture, education, smart cities, environmental monitoring, finance, and more. Each chapter delves into specific challenges, frameworks, and experimental outcomes, making this book an essential reference for academicians, researchers, industry professionals, and students who aim to stay ahead in the rapidly evolving digital world. **Building Cyber Resilience against Hybrid Threats** Mitko Bogdanoski, 2022-08-15. Today's security environment is increasingly complex and unpredictable, with cyber attacks and hybrid warfare blurring the lines between conventional and unconventional forms of conflict. Threats to energy security, such as climate change and natural disasters, and disruptive technologies like AI and quantum computing. The challenge of adapting and responding to these threats calls for cooperation and novel ways of thinking. This book presents 11 edited contributions from the NATO Advanced Training Course (ATC) 'Strengthening SEE Resilient Cyber Defense against Hybrid Threats' (STRENGTH), held as an online event from 26 September to 2 October 2021. The ATC brought together more than 60 military and civilian expert participants, with 19 renowned professors, experts, and practitioners from 14 NATO Member and Partner countries as speakers and lecturers. The ATC aimed to raise awareness about the Alliance and the South Eastern Europe (SEE) evolving complex threat environment and establish the foundation for a long-term multidisciplinary collaboration among defense and security experts and academia, with the event serving as a first step in the creation of a SEE Network of defense security and academic experts which can work across borders, linking state-of-the-art research and practice to build resilience against hybrid warfare capabilities. Participants learned how state and non-state actors acquire hybrid threats via cyberspace to achieve their strategic ends and took part in working groups moderated by invited speakers/lecturers, engaging in the productive discussion of questions related to the course topic. The event concluded with briefings presenting relevant case studies and lessons learned. *Emerging Trends and Future Directions in Artificial Intelligence, Machine Learning, and Internet of Things Innovations* Khumukcham Robindro Singh, Nazrul Hoque, Arnab Kumar Maji, Sabyasachi Mondal, Jyoti Sekhar Banerjee, Siddhartha Bhattacharyya, Panagiotis

Sarigiannidis,2025-09-29 The North East India AI Summit Unravelling Trends NEIAIS 2025 served as a vibrant platform for the exchange of cutting edge ideas and research in the field of Artificial Intelligence with a strong emphasis on both foundational theories and real world applications The summit brought together experts researchers and enthusiasts to explore critical areas including Machine Learning Deep Learning Computer Vision Natural Language Processing Smart Systems IoT Security Network Technology and Artificial Intelligence in Healthcare and Biomedical Applications Discussions also delved into emerging trends and computational techniques highlighting the transformative potential of AI in addressing complex real world challenges The conference received an overwhelming response attracting more than 120 research paper submissions from various regions of India and abroad After a rigorous review process 55 high quality papers were accepted out of which over 44 papers were registered for presentation at the summit By fostering interdisciplinary collaboration and showcasing impactful innovations NEIAIS 2025 aims to inspire sustained research technological growth and broader societal benefits
