## Reddit How To:

**How to Handle a Crowd** Anika Gupta, 2020-08-18 A guide to successful community moderation exploring everything from the trenches of Reddit to your neighborhood Facebook page. Don't read the comments. Old advice yet more relevant than ever. The tools we once hailed for their power to connect people and spark creativity can also be hotbeds of hate, harassment and political division. Platforms like Facebook, YouTube and Twitter are under fire for either too much or too little moderation. Creating and maintaining healthy online communities isn't easy. Over the course of two years of graduate research at MIT, former tech journalist and current product manager Anika Gupta interviewed moderators who'd worked on the sidelines of gamer forums and in the quagmires of online news comments sections. She's spoken with professional and volunteer moderators for communities like Pantsuit Nation, Nextdoor, World of Warcraft guilds, Reddit and FetLife. In "How to Handle a Crowd" she shares what makes successful communities tick and what you can learn from them about the delicate balance of community moderation. Topics include Building creative communities in online spaces, Bridging political division and creating new alliances, Encouraging freedom of speech, Defining and eliminating hate and trolling, Ensuring safety for all participants, Motivating community members to action. "How to Handle a Crowd" is the perfect book for anyone looking to take their small community group to the next level, start a career in online moderation or tackle their own business's comments section.

*Designing for Democracy* Jennifer Forestal, 2022 How should we fix digital technologies to support democracy instead of undermining it? In "Designing for Democracy" Jennifer Forestal argues that accurately evaluating the democratic potential of digital spaces means studying how the built environment, a primary component of our modern public square structures, our activity shapes our attitudes and supports the kinds of relationships and behaviors democracy requires. While many scholars and practitioners are attentive to the role of design in shaping behavior, they have yet to fully engage with the question of what structures are required to support democratic communities and how to build them. Forestal closes this gap by providing a new theory of democratic space. Drawing from a wide range of disciplines including architecture, psychology and the history of political thought, she argues that democratic spaces must be designed with three environmental characteristics: boundaries, durability and flexibility, that taken together afford users the ability to engage in fundamental civic practices. Through extended analyses of Facebook, Twitter and Reddit, Forestal shows precisely how well these digital platforms meet the criteria for democratic spaces or whether they do so at all. The result is a more nuanced analysis of the democratic communities that form or fail to emerge in these spaces, as well as more concrete suggestions for how to improve them. In connecting the built environment, digital technologies and democratic theory, "Designing for Democracy" provides blueprints for democracy in a digital age.

**The Case for Community in Online Spaces** Brooke Dunbar-Treadwell, 2023-08-01 Many believe that our sense of community is dying as the result of our digitized world. In this book, Brooke Dunbar Treadwell refutes this claim and presents a case that connection is thriving in online spaces as people share stories, practice vulnerability and build

communities From memes to Reddit to Facebook Dunbar Treadwell offers perspectives that combine relevant scholarship with examples from her research pop culture and society She addresses some of the factors that contribute to disconnection like political division and dehumanization while also painting a picture of a society that desperately desires connection and may not always know how to find it Ultimately this book illustrates how community and connection have changed over time how they are currently alive and well while offering some important practical advice for how readers can consider their own choices in online spaces to help them find the community that they seek Scholars of communication media studies and political science will find this book of particular interest **What Happens to Our Kids When We Fail to Grow Up**

**Ghost Work** Mary L. Gray, Siddharth Suri, 2019-05-07 In the spirit of Nickel and Dimed a necessary and revelatory expose of the invisible human workforce that powers the web and that foreshadows the true future of work Hidden beneath the surface of the web lost in our wrong headed debates about AI a new menace is looming Anthropologist Mary L Gray and computer scientist Siddharth Suri team up to unveil how services delivered by companies like Amazon Google Microsoft and Uber can only function smoothly thanks to the judgment and experience of a vast invisible human labor force These people doing ghost work make the internet seem smart They perform high tech piecework flagging X rated content proofreading designing engine parts and much more An estimated 8 percent of Americans have worked at least once in this ghost economy and that number is growing They usually earn less than legal minimums for traditional work they have no health benefits and they can be fired at any time for any reason or none There are no labor laws to govern this kind of work and these latter day assembly lines draw in and all too often overwork and underpay a surprisingly diverse range of workers harried young mothers professionals forced into early retirement recent grads who can't get a toehold on the traditional employment ladder and minorities shut out of the jobs they want Gray and Suri also show how ghost workers employers and society at large can ensure that this new kind of work creates opportunity rather than misery for those who do it

Intended Consequences: How to Build Market-Leading Companies with Responsible Innovation Hemant Taneja, Kevin Maney, 2022-01-25 WALL STREET JOURNAL BESTSELLER A pioneering venture capitalist provides an actionable framework for founders and

executives to create innovative enduring companies built for growth and for societal good The Milton Friedman philosophy that companies exist only to increase shareholder value is dead and buried The old Silicon Valley tenets of move fast and break things minimum viable products and hyper engagement at any cost must be replaced with new principles for an era of responsible innovation We can no longer manage businesses solely for growth With innovation comes responsibility to

generate returns beyond profits and to recenter technology as a force for good in the world. This requires a shift in the way organizations approach and value work. A company's mindset, its intent to do good, avoid harmful consequences and innovate responsibly, is not enough. That mindset must be supported by a business model, a mechanism that leaders must intentionally and proactively build along with the company from the ground up, one that incentivizes and rewards the organization for fulfilling its intentions. Companies need a new set of KCIs or key consequence indicators that measure factors such as its impact on customers' energy consumption, whether its product is being used equally across socioeconomic groups, or if it is actually solving the social problem it is addressing. Not only is this the right thing to do, increasingly it is what customers, employees and shareholders demand of business. In this inspiring, practical and actionable guide, Hemant Taneja lays out the argument for why a new model of company building and leadership is necessary and how it can lead to better performance. It explores why social good businesses are some of the greatest opportunities today, detailing examples of billion dollar startups that are addressing inequality, climate change, systemic societal problems and chronic disease, all while generating profit and positive shareholder returns. It presents a topic by topic road map that addresses business models, artificial intelligence, ethical growth, culture, governance and good citizenship. Intended Consequences is designed as the ultimate playbook for founders, entrepreneurs, leadership teams and investors on how to build and maintain a responsible innovation company.

## **Social Networks: How Brands Create Authentic Engagement by Understanding What Motivates Us Joe**

Federer, 2020-09-15 From the former Head of Brand Strategy at Reddit comes a proven and thought provoking approach to the digital economy and how brands can create authentic engagement that is rooted in the fundamental motivations behind human psychology. Leading marketing practitioner and thought leader Joe Federer draws on evolutionary biology, anthropology, neuroanatomy, and psychology as well as more than a decade of hands on experience to explain why people act so differently in various online spaces and what they are seeking from participating in each one. With a framework based on Freud's Id, Ego, and Superego model of the human psyche, he demonstrates how the internet is a digital reflection of the collective human psyche and how different social networks correspond to different mindsets. Platforms like Reddit to the unfiltered Id, Facebook and Twitter to the managed Ego, and Instagram to the ideal Superego. In the same way you behave differently when you're home alone, out with friends, communicating with family, or interacting with coworkers, people act and express themselves differently in these various online spaces. Context matters. Understanding this will enable you to develop and execute effective engagement strategies to reach your target audiences on each social network. Learn how to create content that drives sharing and word of mouth, how brands can fit natively into different types of social channels, how to balance branded social presences across different networks, why authenticity will only grow in importance to consumers. Fascinating and deeply compelling, *The Hidden Psychology of Social Networks* will equip you to make vastly more efficient use of your media buys, establish more thoughtful strategies, develop better creative, and in the end, deliver more effective marketing that provides value.
