**Global Perspectives on Animism and Autonomous Technologies** Ralph M. Becker, Antônio Luz Costa, Andrew Ventimiglia, 2025-05-26 This volume provides a timely analysis of the emerging phenomenon of autonomous technology a topic of intense contemporary importance given the transformative potential and risks posed by rapidly developing AI systems. It utilizes a unique approach by focusing on the ways that these technologies can be understood via the lens of animism and techno animism a term that denotes how society and individual users are attributing life like properties agency intention and will to technological systems. The volume further interrogates and critiques the ways that autonomous technologies are often intentionally designed to promote socioemotional connections with users. The volume investigates such technologies through a variety of global settings and interdisciplinary lenses. With contributions from scholars across anthropology sociology communication studies law and design theory it offers a range of perspectives on how autonomous technologies are reshaping cultural and social institutions worldwide. Furthermore this collection addresses the urgent need for concrete research on the readiness of legal and social frameworks to incorporate autonomous technologies. With the imminent widespread integration of autonomous technologies into our everyday lives the volume provides a critical examination of human technology interaction and its immediate implications guiding readers through the intricate web of digital interconnectedness that is on course to define the future of humanity.

**AI Aesthetics** Jan-Noël Thon, Lukas R.A. Wilde, 2025-09-09 This volume investigates the intersection of generative AI and media aesthetics from an interdisciplinary perspective. Combining in depth theoretical reflection with a diverse selection of case studies its authors explore the aesthetic forms of AI generated medial objects as

well as the cultural imaginaries that the latter draw upon Bringing together a group of scholars from various geographic and disciplinary backgrounds the chapters move within and across different conceptualizations of AI aesthetics that can be located in between an aesthetics as artistics that is primarily concerned with aesthetic judgments related to skill and connoisseurship and an aesthetics as aisthetics that identifies all kinds of embodied perception as its object The book thus reflects on both the theoretical and the methodological implications of AI aesthetics while also demonstrating that this is still very much an emerging research field and that no dominant conceptualization of AI aesthetics has yet emerged Considering its decidedly international and interdisciplinary scope AI Aesthetics AI Generated Images between Artistics and Aisthetics will appeal to scholars and students within media studies cultural studies literary studies philosophy art history visual culture studies digital humanities and critical AI studies The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4 0 license
