## Steel Detailing Guide:

**Steel Detailers' Manual** Alan Hayward, Frank Weare, A. C. Oakhill, 2011-03-01 This highly illustrated manual provides practical guidance on structural steelwork detailing. It describes the common structural shapes in use and how they are joined to form members and complete structures. It explains detailing practice and conventions, provides detailing data for standard sections, bolts and welds, emphasises the importance of tolerances in order to achieve proper site fit up, discusses the important link between good detailing and construction costs. Examples of structures include single and multi storey buildings, towers and bridges. The detailing shown will be suitable in principle for fabrication and erection in many countries and the sizes shown will act as a guide to preliminary design. The third edition has been revised to take account of the new Eurocodes on structural steel work together with their National Annexes. The new edition also takes account of developments in 3 D modelling techniques and it includes more CAD standard library details. **Steel Detailers Manual** Alan

Hayward, Frank Weare, 1993-01-18 In the past detailing for steel structures was often left to the fabricator. Now however engineers realise that the viability and safety of steel structures depend on good detailing which allows for economical fabrication and final erection. This highly illustrated manual is the first book to provide a comprehensive introduction to steel details. It explains detailing practice and conventions, includes detailing data for standard sections, bolts and welds, and covers a wide range of structures including single and multi storey buildings, towers and bridges.
