Marsh's *Becoming a Teacher* 6e continues to offer pre-service teachers a practical and user-friendly guide to learning to teach that students find invaluable throughout their entire degree. Marsh covers a comprehensive introduction to teaching methodology, preparing pre-service teachers for the challenges they face in a 21st century classroom. The approach in this 6th edition is more reflective and gives readers an even greater opportunity to interact with issues raised in the text.

Educational Computing Cleborne D. Maddux, Dee LaMont Johnson, Jerry Willis, 2001

This text focuses on general concepts, theory, and research on teaching, learning, and technology rather than on hands-on assignments at the computer. This book is most suitable for courses where students already have basic computing skills and the focus is on issues of integration of technology in the classroom or for courses where computing skills are taught simultaneously with the concepts, issues, and theories of integration. This text is geared toward answering the question: What would a teacher do differently if she/he used computers in her/his classroom? The book links actual practice to underlying theories of both teaching and learning. It helps students develop their own framework for thinking about educational computing.
