

Principles of Biology: GBIO 1000

Exam I Study Guide

Refer to your lecture notes for the depth of information pertinent to each topic. Link your engagement papers to the outline

Topic Outline 01a: The Nature of Science and Biology

Chapter 1.2

Science for All Americans – ER

Concerns of Science – ER

How often are Scientific Studies Retracted? – ER

What is the difference between an educated person and a knowledgeable person according to Israel Sheffler?

- An educated man's outlook is transformed by what he knows

Being scientifically literate is required for the following: (the 3 "knows")

- **Knowing Yourself**
 - Personal decision making
- **Knowing your World**
 - Remediating the effects of the Fall
 - Participation in civic and cultural affairs
- **Knowing your God**
 - Creation Mandates
 - Adam's first assignment
 - Sursum corda Ps. 8 and 9; Rom. 1: 18-20
 - Sursum bonum Col. 3:23& Gen. 1:26-28; 2:15

Illustrating the need for scientific literacy:

- Explain the relationship between Yellowstone cutthroat trout and declining bird and other populations
 - They are decreasing in population by 90%.
- What is happening to the populations in the cane toad case studies? What is a possible origin of the problem? Will or does the problem affect human populations?
 - More intersexed cane toads are popping up than male cane toads.
 - Land development, poisoning by chemicals.
 - The chemicals could affect human population
- There is a correlation between hectares of farming and % of inter-sexed toads. Describe the correlation and if it is synonymous with causation.
 - Correlation does not mean causation. Is the cause of feminized male toads associated with land development or poisoning by chemicals? The increase in farming within the vicinity of toad populations = increase in population of feminized frogs.

Describe in a sentence or two what the general goals of science are.

- Science aims to explain and understand. Science as a collective institution aims to produce more and more accurate natural explanations of how the natural world works, what its components are, and how the world got to be the way it is now.
