This long awaited manual for engineers and managers involved in the well completion and intervention side of a well's life covers the fundamentals of design equipment and completion fluids. In addition the book covers more important and distinguishing components such as well barriers and integrity envelopes well kill methods specific to well completion and other forms of operations that involve completion like pumping and stimulation including hydraulic fracturing and shale coiled tubing wireline and subsea intervention. Provides a training guide focused on well completion and intervention. Includes coverage of subsea and fracturing operations. Presents proper well kill procedures.
