### **Handbook of Research on Project Management Strategies and Tools for Organizational Success**

Moreno-Monsalve, Nelson Antonio, Diez-Silva, H. Mauricio, Diaz-Piraquive, Flor Nancy, Perez-Uribe, Rafael Ignacio, 2020-01-17

Project management tools can be used as an alternative to improve and strengthen a company's position in the market. However, the management of projects has been in constant transformation. Elements such as time, cost, and scope on which it is based have been complemented with other trends such as the project team, change management, knowledge management, good negotiation practices, management of stakeholders, sustainability, etc. In order to improve the competitiveness of their company and increase earned value, managers must remain up to date on these latest transformations and best practices. The *Handbook of Research on Project Management Strategies and Tools for Organizational Success* is a pivotal reference source that analyzes and disseminates new trends that will allow managers to improve their skills and strengthen the performance of their companies through obtaining better results in the projects undertaken. While highlighting topics such as market growth, risk management, and value creation, this book is ideally designed for project managers, managers, business professionals, entrepreneurs, academicians, researchers, and students seeking current research on improving the competitiveness of companies as well as increasing their earned value.

**Human Capital and Competences in Project Management** Manuel Otero-Mateo, Andres Pastor-Fernandez, 2018-02-07 People's competence has a strong influence on the strategy of human resource management, affecting daily aspects, thought patterns, and behavioral modes of executive management and employees. From a business perspective, there is a strong relationship between human capital and success, and also an integral development of the human factor in all its dimensions, both personal and professional, and social competences must be a key factor to reach it. To help achieve this business excellence, it is necessary to transfer the demands of the labor market into education, and one of the ways is through a methodological framework for Project Management and Management, specifically the IPMA Individual Competence Baseline, which is an essential tool for achieving economic growth, corporate development, and competitiveness.
