

Summary Worksheet 3**Directions:** Read each passage. **Highlight or underline** necessary information. Write your summary.

1. The English were not the first Europeans to land their ships on American soil. The Vikings had discovered North America in the 11th century. Columbus landed in the Bahamas in 1492 for Spain, and the French began expeditions to the New World in 1524. But the first English presence in North America is important because the thirteen English colonies that would later be established eventually became the country now known as the United States of America.

2. In April of 1585 Sir Walter Raleigh, under the authority of Queen Elizabeth of England, sent an expedition of seven ships carrying 600 men, half of them soldiers, to found an English **colony** in North America. The colony was to be used to establish an English presence in the New World as well as a base from which English privateers, or pirates, could attack and plunder Spanish treasure fleets. Raleigh's cousin, Sir Richard Grenville, led the expedition.

3. In July of that year the bulk of the fleet reached a small island off the coast of Virginia that was called Roanoke. After building a small fort on the north side of the island, the colonists initiated relations with a Native American tribe that lived on the island, the Aquascogoc. These natives showed little interest in building relations with the English colonists, and they soon parted company. After this encounter, however, the English noticed that one of their silver cups had gone missing, and they attributed its disappearance to the Aquascogoc. Grenville, the English captain, was furious. He believed that the Aquascogoc had stolen the silver cup. Whether or not this was true, angry exchanges followed and soon the English burned the Aquascogoc village. The English held their fort against the subsequent attacks of the natives.

4. Despite their success in battle, the colonists had a miserable time because they were mainly soldiers and adventurers, not farmers. They were hungry. They missed the comforts of England, such as soft feather beds and dainty foods. Also they had expected to find gold and silver on the island, and were disappointed when they found none. Grenville soon tired of these conditions and set out on his ship to plunder Spanish treasure fleets and return to England. The colony was gradually abandoned.

Elliott, 1979 Elementary English Grammar and Composition George Anthony Twentyman, 1926 Activities for Junior High School and Middle School Mathematics Kenneth E. Easterday, Loren L. Henry, F. Morgan Simpson, 1981 Activities are one means of connecting both the various strands of mathematics with one another and mathematics with other disciplines This compilation of articles from NCTM journals includes strands on problem solving reasoning number relationships statistics and more **Learning to Predict and Predicting to Learn** Thomas DeVere Wolsey, Douglas Fisher, 2009 Featuring practical instructional routines that are clearly linked to cognitive strategies students need to make sense of text this book combines a rationale written from the perspective of current research that supports the use of the strategy or instructional routine with clear step by step directions and multiple examples from the classroom experiences of teachers across the United States These experiences appear as boxed features that are easily identifiable by the reader The text is written in such a way that readers may start on page one and work through the end of the book or use the book as a reference for their own practice or as an inservice tool Each cognitive strategy is linked via convenient matrices to the instructional routines that promote precision thinking on the part of students Features Differentiation between cognitive strategies for students and instructional routines teachers might use Provides teachers and preservice teachers with a means to think about the tools they use to promote cognitive proficiency on the part of students

Often strategies are used a catch all term that does not clarify the difference between what teachers do and how students incorporate learn from those routines Boxed features Real teachers explain how they have used the tools discussed in the book Provides teachers with examples to which they may be able to relate Instead of an isolated example the voices of classroom teachers will explain how they have implemented instructional routines or promoted cognitive strategies for their students Sound rationale coupled with step by step procedures Teachers often like to know what works but many texts ignore their need and desire to know why a strategy or routine works This text links rationale with tools so that readers will be able to explain why they are using a routine or assisting students to use cognitive tools to understand how they might think more precisely about the books they read Theme Prediction Prediction is a popular request teachers make of their students but often teachers lack sufficient experience or rationale to know how students might use prediction to increase precision in thinking about books and other texts they read Approach Combination of both theoretical and research with useful tools students and teachers can implement tomorrow Many books take either a theoretical approach with little classroom application provided or a practical approach that does not help teachers understand why a given tool is useful and under what circumstances This book combines the best of both approaches to help teacher readers understand why a strategy or routine is worth the instructional time that might be devoted to it Learning and Leading with Technology ,2006
