Thi Nguyen,2026-01-13 A philosophy of games to help us win back control over what we value The philosopher C Thi Nguyen one of the leading experts on the philosophy of games and the philosophy of data takes us deep into the heart of games and into the depths of bureaucracy to see how scoring systems shape our desires Games are the most important art form of our era They embody the spirit of free play They show us the subtle beauty of action everywhere in life in video games sports and boardgames but also cooking gardening fly fishing and running They remind us that it isn t always about outcomes but about how glorious it feels to be doing the thing And the scoring systems help get us there by

giving us new goals to try on Scoring systems are also at the center of our corporations and bureaucracies in the form of metrics and rankings They tell us exactly how to measure our success They encourage us to outsource our values to an external authority And they push on us to value simple countable things Metrics don t capture what really matters they only capture what s easy to measure The price of that clarity is our independence The Score asks us is this the game you really want to be playing *Kindergarten Review* ,1902 Geothe's pedagogics. ...
