**XML Data Management** Akmal B. Chaudhri, Awais Rashid, Roberto Zicari, 2003 In this book you will find discussions on the newest native XML databases along with information on working with XML enabled relational database systems In addition XML Data Management thoroughly examines benchmarks and analysis techniques for performance of XML databases This book is best used by students that are knowledgeable in database technology and are familiar with XML

**An Analysis of the Current Development Stage of the eXtensible Markup Language (XML) and its Usage for Database Systems** German Saueressig, 2002-10-01 Inhaltsangabe Abstract The eXtensible Markup Language XML is receiving a great deal of attention from computing and Internet communities This is mainly because of its ability to reduce obstacles in sharing data among diverse applications and databases by providing a common format for expressing data structure and content The scope of this project is to investigate the current stage of XML and its usage for database systems In order to understand the XML database technology a general introduction to both database systems and XML is provided to the reader in chapter two and three Chapter four and five deal with the methodology and findings of this project These chapters rely on articles case studies and surveys which are examined and evaluated Finally a conclusion and review chapter is included The analysis of the current adoption of XML among software developers revealed that in Spring 2001 more than one third of international developers already used XML In 2001 they spent about 5 4% of their development time using XML For 2002 it is predicted that they will spend an average of 9% of their development time using XML Concerning XML databases there are currently two major XML related database types available These are native XML and XML enabled relational databases Native XML databases are constructed to use the recommended XML standards to the most possible extent Thereby the XML document is the fundamental unit of storage XML enabled relational databases are relational databases equipped with an additional layer to map XML content in to the relational tables XML documents are only used as a means of transport between the database systems Native XML databases are better suited for dealing with document structured content whilst XML enabled relational databases are more appropriate to handle data structured content such as numbers and pieces of text The implementation process of an XML related database system into an organisation requires the right management of change to be able to handle both the technology involved and the people affected by the database system Therefore effective change management must cover the whole project life cycle from the formulation of the strategy to the achievement of the benefits Inhaltsverzeichnis Table of Contents DISCLAIMERII CONTENTSIII LIST OF FIGURESVI LIST OF TABLESVII ABSTRACTVIII CHAPTER 1 INTRODUCTION1 1 1Background to this Study1 1 2Research Question2 1 3Task

**Database and Expert Systems Applications** Kim V. Andersen, John Debenham, Roland Wagner, 2005-08-11 DEXA 2005 the 16th International Conference on Database and Expert Systems Applications was held at the Copenhagen Business School Copenhagen Denmark from August 22 to 26 2005 The success of the DEXA series has partly been due to the way in

which it has kept abreast of recent developments by spawning specialized workshops and conferences each with its own proceedings In 2005 the DEXA programme was co located with the 7th International Conference on Data Warehousing and Knowledge Discovery DaWaK 2005 the 6th International Conference on Electronic Commerce and Web Technologies EC Web 2005 the 4th International Conference on Electronic Government EGOV 2005 the 2nd International Conference on Trust Privacy and Security in Digital Business TrustBus 2005 the 2nd International Conference on Industrial Applications of Holonic and Multi agent Systems HoloMAS 2005 as well as 19 specialized workshops These proceedings are the result of a considerable amount of hard work Beginning with the preparation of submitted papers the papers went through the reviewing process This process was supported by online discussion between the reviewers to determine the final conference program The authors of accepted papers revised their manuscripts to produce this fine collection DEXA 2005 received 390 submissions and from those the Program Committee selected the 92 papers in these proceedings This year the reviewing process generated more than 1000 referee reports The hard work of the authors the referees and the Program Committee is gratefully acknowledged
