International Handbook of Research on STEAM Curriculum and Practice Stephen J. Farenga, Salvatore G. Garofalo, Daniel Ness, 2025-10-24 This comprehensive handbook delves into curriculum praxis human development and cognition within the contexts of the STEAM disciplines science technology engineering arts architecture and mathematics. Cutting edge research will help educators identify best practice techniques for developing students' knowledge in STEAM subjects as well as capture contemporary social and political issues within the STEAM context. Drawing on the work of over 50 international contributors, this volume covers both emergent and established areas of research, giving voice to newcomers to the field as well as perspectives from established experts. These areas are divided into five sections on foundations, content, teaching and learning throughout the lifespan, equity and enrichment, and settings. Each topic is considered in both its historical and current context with a focus on the interconnections between theory and practice. This book offers a first of its kind overview of STEAM curriculum development which will be especially useful to educational practitioners and researchers of STEAM subjects as well as teacher educators overseeing STEAM education. This resource will also be useful for K-12 school and institutional libraries as reference material and for curriculum specialists and administrators seeking to identify methods of best educational practices within STEAM.

Generative AI in Education Ilaria Torre, Diego Zapata-Rivera, Chien-Sing Lee, Antonio Sarasua-Cabezuelo, Ioana Ghergulescu, Paul Libbrecht, 2024-12-24 In the field of education, there is a growing interest in the use of Generative Artificial Intelligence to reshape the educational landscape. Led by our esteemed Associate Editors Dr. Zapata Rivera, Prof. Torre, and Review Editors Profs. Lee, Sarasua-Cabezuelo, Libbrecht, Dr. Ghergulescu, this editorial initiative aims to investigate the transformative potential of Generative AI in various aspects of education. By leveraging machine learning models, these intelligent systems extract useful insights from vast amounts of data, making them capable of delivering highly individualized content. They can analyze a learner's proficiency level, learning style, and pace, and then tailor the study material accordingly. Whether a learner prefers visual aids, textual content, or interactive modules, Generative AI can adapt its content generation strategies to meet distinct preferences and learners' needs. This ensures an elevated engagement level and enhanced comprehension, highlighting its potential to transform traditional teaching methodologies.

Affecting, Emoting, and Feeling Disability: Entanglements at the Intersection of Disability Studies and the Sociology of Emotions Yvonne Wechuli, Marie Sepulchre, Kelly Fritsch, Stina Bergman Blix, 2025-09-30 This Research Topic explores theorizing on disability and emotion as one frontier of the Sociology of Emotions as it intersects with Disability Studies. While the Sociology of Emotions has only engaged with disability in limited ways so far, emancipatory knowledge produced about disability within the broad field of Disability Studies, including fields like Mad Studies, Deaf Studies, and Critical Autism Studies, provides a rich archive of emotional first-hand accounts of feelings and affective relations such as joy, pride, shame, disgust, and fear that are often undertheorized. Importantly, the fields of Sociology of Emotions and Disability Studies understand their central topics as

primarily social cultural political and ecological phenomena challenging their conceptualization as natural individual or as limited to the realm of the human By bringing both fields into conversation with one another this special issue aims to deepen our understanding of emotions feelings and affect related to disability *Innovations in Teaching and Learning for Health Professions Educators* Roger Edwards,Bobbie Ann Adair White ,Ardi Findyartini,2025-06-02 The health professions continue to evolve and change rapidly as more opportunities and challenges emerge Hence health professions educators are required to be adaptive and nimble in their creation and adoption of teaching and learning innovations These innovations have included teaching with technologies like virtual reality gamification online applications and artificial intelligence Innovations also include know how such as emotional intelligence and ways of approaching the learning process through student centered learning experiences grounded in the cognitive science of learning Scholarship related to identification of the best uses of different innovations is difficult The same innovations have proven to be engaging in some contexts and burdensome in others Additionally simulation based education continues to incorporate innovations in how health professions educators are taught with more focus on effectiveness of the simulation educator including applications with distance simulation Training and development for health professions and simulation educators is becoming more formalized yet gaps on effectiveness of training and development efforts persist Faculty effectiveness especially as it relates to educational innovation adoption is difficult to measure and demonstration of related competencies is in its infancy The goal of this Research Topic is to bring together state of the art examples of scholarship in health professions education related to the awareness and appropriate adoption of innovation which is broadly defined as an idea practice technology and know how Evidence about the current state of emerging innovations effectiveness of innovations and evidence about the competencies needed for teaching in our evolving environments are all areas of interest for this collection All types of scholarship can support this focus including analyses based on primary quantitative and qualitative data collection secondary data analyses literature reviews and methodological infrastructure tool development Additionally scholarship investigating how these innovations have influenced health professions educators including their training and development is part of the goal of the collection The scope of this collection covers any innovations that are applicable to professional development and implementation for health professions educators More specifically we invite scholarship related to how educators prepare themselves for meeting the needs of their students given the changing roles and innovations available to both faculty and students across learning environments worldwide Examples of topics of interest include Analyses of innovation related to the evolving roles of health professions educators Reviews of educational innovation adoption by health professions education faculty especially related to artificial intelligence linked applications Exploring factors associated with professional development training and effective educational innovation adoption by faculty Simulation based educational innovation applications for faculty development Faculty innovation in resource constrained environments in low and middle income
