Global ICT Industry and Market Report: 2013 Edition MIC Research Team, 2016-08-01 The rigid economic conditions in 2012 stemming from the European debt crisis, slow recovery of mature economies and less expected growth in the emerging markets had caused government and enterprise sectors to cut down their spending and led to low consumer confidence. Improved broadband service quality and increased income per capita in emerging countries have made smart handheld devices and other consumer electronic devices the engine of growth for the ICT Industry. This report profiles the development of motherboard, notebook, PC, including netbook, server, tablet, smartphone, large, medium and small LCD panels, LCD TV and DSC (Digital Still Camera) in 2013 and examines their future trends beyond.
