## **Soulmaking Uncommon Paths To Self Understanding:**

**Soulmaking** Michael Grosso,1997 While science and religion debates the very existence of a soul Grosso does not ask do we have a soul but how do we make our souls This book takes readers on a journey to the edge of the transpersonal realm embracing UFOs ghosts demons and angels in a series of historical and contemporary vignettes that explore how unusual experiences build the soul and transform the soulmakers *The Way Back to Paradise* Joseph M. Felser,2005-01-05

Paradise is not the state of being in harmony but the process of harmonizing It is not a garden of bliss but the bliss of gardening Paradise is about mending the self restoring the balance getting back into tune bringing all our discarded and forgotten parts into the whole That means paying attention to and honoring synchronicities precognitive dreams telepathic communications visions and all manner of experiences of psychic sensitivity Philosophy professor Joe Felser realized that what he calls the decrepit decaying cultural ideologies in exclusively favoring reason and logic were excluding the equally real world of magic and psychic activities He began to investigate and the closer he looked the more he found But he wasn't ready to abandon the world of reason and logic Instead he wanted to see if he could find a way to blend the two He did The result is this book In *The Way Back to Paradise* Felser takes you through his day showing what everyday life looks like when you live that blend His stories both magical and reasonable point the way toward a new kind of paradise one suited to the 21st century [Introduction to Transpersonal Psychology](#) Paul F. Cunningham, Ph.D.,2021-12-28

[Introduction to Transpersonal Psychology](#) Bridging Spirit and Science provides an accessible and engaging introduction to this complex and evolving field Adopting a modular approach the book systematically relates key themes of Transpersonal Psychology to three major areas within psychology general psychology experimental psychology and clinical psychology Covering a wide range of topics including transpersonal states of consciousness biological foundations research methods and cognition the book also features extensive discussion of transpersonal theorists and the impact of their work on our understanding of psychological concepts The book also introduces contemporary developments in the field and anticipates future advances such as feminist perspectives and cross cultural approaches alongside practical experiments designed to give transpersonal theories and concepts psychological roots A critical evaluation of both mainstream and transpersonal theories and research is applied throughout to foster analytical skills and encourage critical and scientific thinking about humanity's nature as spiritual creatures and ways to educate for personal and social transformation Accompanied by an online instructor's manual this book will be an essential companion for all students of Transpersonal or Humanistic Psychology or those interested in applying transpersonal ideas to mainstream psychological research [The Extraordinary Healing Power of Ordinary Things](#) Larry Dossey,2007-06-05 Every day modern medicine announces the arrival of yet another wonder drug or miracle procedure to a world increasingly wary of expensive high tech cures Drugs transplants and surgery don't work for 90 percent of our aches and pains and while we are grateful for life saving developments we know that most come with risks that we ignore at

our peril Long hailed as one of the founding fathers of mind body medicine Larry Dossey directs our attention to simple sources of healing that have been available for centuries treasures often hidden in plain sight from the power of optimism and of tears to speed recovery to the surprising usefulness of dirt and bugs in curing disease and infection to the benefits of doing nothing Exploring the medical research that validates these simple remedies Dossey encourages us to align ourselves with the wisdom of nature and allow true healing to take place *The Extraordinary Healing Power of Ordinary Things* can transform our view of what health is all about whether our concern is cancer or the common cold

*The Myth of the Great Ending* Joseph M. Felser, 2025-09-12 From Christian believers in the Apocalypse and the Rapture to New Age enthusiasts of prophecies concerning the year 2012 Doomsday lore has been a part of culture a myth that colors how we perceive the world Why do we remain obsessed with Doomsday myths even when they fail to materialize What if we haven't recognized the true message of these myths Blending history psychology metaphysics and story philosopher and author Joseph Felser explores the spiritual questions raised by these enduring myths Along the way he consults the work of Joseph Campbell Carl Jung Marie Louise von Franz Black Elk Wovoka Itzhak Bentov Jane Roberts Seth Hermann Hesse Ingo Swann David Bohm Fred Alan Wolf J Allen Boone William James and Robert Monroe through ever widening circles of understanding Felser suggests that our obsession with The End of the World hides a repressed healthy longing for reconciliation with our inner and outer worlds with nature and our own natural spirituality He urges us to recognize and act upon that longing When we begin to listen to nature's voice and pay heed to our own dreams including visions intuitions and instinctive promptings the greatest revolution in all history will unfold We can create a future of our own choosing a beginning rather than an ending

**What Matters?** Courtney Bender, Ann Taves, 2012-05-08 Over the past decade religious secular and spiritual distinctions have broken down forcing scholars to rethink secularity and its relationship to society Since classifying a person activity or experience as religious or otherwise is an important act of valuation one that defines the characteristics of a group and its relation to others scholars are struggling to recast these concepts in our increasingly ambiguous pluralistic world This collection considers religious and secular categories and what they mean to those who seek valuable ethical lives As they investigate how individuals and groups determine significance set goals and attribute meaning contributors illustrate the ways in which religious secular and spiritual designations serve as markers of value Reflecting on recent ethnographic and historical research chapters explore contemporary psychical research and liberal American homeschooling the work of nineteenth and early twentieth century American psychologists and French archaeologists the role of contemporary humanitarian and volunteer organizations based in Europe and India and the prevalence of highly mediated and spiritualized publics from international psy trance festivals to Ghanaian national political contexts Contributors particularly focus on the role of ambivalence attachment and disaffection in the formation of religious secular and spiritual identities resetting research on secular society and contemporary religious life while illuminating what matters in the lives of ordinary
