L. Munjal,2013 Annotation Vibration and noise are two interrelated terms in the field of mechanical engineering Vibration is caused by unbalanced inertial forces and moments whereas noise is the result of such vibrations Noisy machines have always been a matter of concern It is now well understood that a quieter machine is in every way a better machine Lesser vibration ensures manufacturing to closer tolerances lesser wear and tear and longer fatigue life Hence a quieter machine is more cost effective in the long run This book deals with such industrial and automotive noise and vibration their measurement and control      Sound Analysis and Noise Control John Foreman,2012-12-06 This book has been written to provide an intro Chapter 2 deals with the mechanism of hear duction to the fundamental concepts of sound ing and the subjective rating of
