**Artificial Intelligence** Alfio Quarteroni, 2025-07-19 Artificial intelligence AI is transforming multiple aspects of human life raising fundamental questions Is AI truly intelligent Can it surpass human capabilities What are its risks and opportunities In this book I aim to clarify what AI really is debunking myths while offering a rigorous balanced perspective on its impact Rather than chasing the latest AI trends I will focus on the core principles that define it tracing its evolution from early pioneers like Alan Turing to today s advanced systems AI remains in the realm of narrow intelligence excelling at specific tasks but far from replicating human cognition Yet its ability to process vast data predict behaviors and generate creative content is reshaping industries from healthcare to finance At the heart of AI s progress is machine learning particularly neural networks which rely more on data driven training than traditional scientific theory However this innovation comes with challenges environmental costs job market disruptions ethical dilemmas and the black box problem AI s decision making opacity which raises concerns about trust and accountability AI also plays a growing role in global power dynamics influencing governance security and even democracy Nations leading AI development gain strategic advantages but without careful regulation AI could fuel inequality surveillance and manipulation Despite the fears AI evokes it is neither an existential threat nor a magical solution My goal is not to celebrate or demonize it but to provide a critical framework for understanding this technological revolution By fostering awareness we can shape AI s integration into society in a way that aligns with human values and scientific progress

*Fentanyl Nation* Ryan Hampton, 2024-09-24 A passionate call to abandon ineffective drug war policies reframe addiction as a public health issue and end the Fentanyl crisis The American overdose crisis has reached record breaking heights preventable overdoses are now responsible for more annual deaths than traffic accidents suicide or gun violence Fentanyl a

potent inexpensive and easy to manufacture synthetic opioid has thoroughly contaminated the drug supply and while it frequently makes front page news across the country it remains poorly understood by policymakers and the public Why despite all of our efforts to raise awareness and billions of dollars of investments does this emergency keep getting worse In Fentanyl Nation recovery advocate Ryan Hampton separates the facts from the fiction surrounding Fentanyl and shows how overdose deaths are ultimately policy failures Instead of investing in education harm reduction effective treatment and recovery we have doubled down on more police more incarceration and harsher penalties for those caught in the grip of addiction Yet history has shown time and time again that it is impossible to arrest our way out of a public health crisis the government used the same strategy to fight the crack cocaine epidemic of the 80s and 90s and it only resulted in racially disparate policing and the destruction of marginalized communities This urgent and informative manifesto reveals how prejudice discrimination and stigma have been codified into our drug laws and calls for a compassionate and evidence based approach that would address the core causes of addiction and save countless lives We can end this crisis but only if we get out of our own way
