Making Media Futures Phillip H. Roth, Ana María Guzmán Olmos, Alin Olteanu, Stefan Bösch, 2025-04-22 Making Media Futures offers a multi perspectival exploration of how imaginaries and knowledge of the future are constructed in and through various media The volume addresses the discursive dimensions of imaginaries and future visions as well as the impact of technological material and cultural conditions on the propagation of future discourses through media Providing both theoretically detailed and empirically rich investigations the contributions offer a wide range of cases spanning the century from the end of World War II until today and looking at examples from the Southern Hemisphere as well as the Global North Bringing together scholars in media studies science and technology studies STS and the history and philosophy of technology the chapters discuss future visions and imaginations of quantum computing the uncertainty and impact of AI based text to image generation the ideology behind 5G telecommunication standards imaginaries of the Internet of Things transmedia strategies in global and local climate protests how broadcast radio was implicated in the evangelical mission imaginary and how early visions of automating scholarly information management shaped standards and ideals of academia The volume thus complements existing approaches and analytical frameworks for the study of imaginaries and futures discourses with perspectives that are sensitive to the plurality of media specific conditions and technologies The book will interest students and scholars working in media studies STS history and philosophy as well as at the intersection of engineering humanities and social sciences on matters such as sustainability ethics and responsible innovation **c't**

**Working with AI** c't-Redaktion, 2024-01-24 The special issue of c't KI Praxis provides tests and practical instructions for working with chatbots It explains why language models make mistakes and how they can be minimised This not only helps when you send questions and orders to one of the chatbots offered online If you do not want to or are not allowed to use the cloud services for data protection reasons for example you can also set up your own voice AI The c't editorial team explains where to find a suitable voice model how to host it locally and which service providers can host it The fact that generative AI is becoming increasingly productive harbours both opportunities and risks Suitable rules for the use of AI in schools training and at work help to exploit opportunities and minimise risks Decoding Generative AI Farabi Shayor, Kelina

Lowther-Harris, Kirithana Srinivasan, Anoushka Samanta, 2024-04-16 The emergence of Generative AI has marked a significant turning point heralding a new age of innovation and intellectual exploration Much like a compelling narrative this advancement in artificial intelligence has captivated the global community and ushered in an unprecedented surge of innovation For many years the subtle hum of AI has been interconnected into the fabric of our society Devices such as Echo Alexa and Google Home once considered avant garde are now seamlessly integrated into our homes and vehicles becoming essential navigators in our daily journeys However this new phase of AI evolution is distinct Capable of enhanced ability these new generative AI systems could easily discern the intuitive needs of their end users With a mere command or a simple

image generative AI systems can draft comprehensive reports write legal documents or produce intricate visual masterpieces Their proficiency can also be extended to routine and mundane tasks smoothly managing administrative duties writing correspondences and providing invaluable support in professional settings Although these foundation models require a vast amount of training data and billions of parameters to be effective the outcomes are equally remarkable Technology companies and investors recognising the potential embarked on an investment spree steering a new era for the development of specialised models such as Microsoft CoPilot Midjourney ChatGPT and so on As these technology companies continue to improve their language models each version seems to be more refined than its predecessor Foremost among these are the Large Language Models LLMs emblematic of this AI renaissance Now with voice activated capabilities generative AIs have become capable of much more in the relatively short span of their existence With the integration of voice activated features combined with their capabilities to speak like a human being their potential continues to grow exponentially They aren't labelled as chatbots anymore these AI systems signify a technological paradigm shift reshaping humanity's understanding of technology automation and creative expression However with such shift comes the imperative need for governance and control The unchecked expansion of AI poses unmitigated challenges In reality these advanced AIs have the potential to be transformative and destructive parallelly Thus it is necessary to establish guidelines and oversight to ensure the ethical deployment of such systems which this book focuses on As society stands at this transformative crossroads parallels are being drawn to the imaginative world of fiction The concept of Jarvis AI from the fictitious world appears provocatively close to becoming a reality The epoch of generative AI has truly dawned promising a future where technological prowess and human aspiration unite
