Chans, 2025-08-06 The World Economic Forum stated in its 2023 Future of Jobs report that 44% of workers' skills will change in the next five years. Additionally, six out of ten workers will require training before 2027 and only half will have adequate training opportunities. With this in mind, the three most pressing challenges currently facing the Continuing Engineering Education (CEE) community include:

1. The shifting skill requirements dictated by the job market. Engineering roles in various sectors are evolving, demanding a mix of Knowledge, Skills, and Abilities (KSA) that is difficult to predict with certainty. In addition, the pace of Digital Transformation will highly influence these requirements.
2. The climate change mitigation and adaptation. Engineers must reskill and adapt to changing sustainability requirements and educational programs must support this transition.
3. The underrepresentation of minorities. Women, racial and ethnic minorities, and individuals with disabilities face disparities in opportunities, mentorship, and inclusion.

**Benny the Blue Whale** Andy Stanton, 2023-11-02 AI is changing the world at frightening speed. A bestselling author decides to find out more. Something profound and utterly brilliant is going on. Hilarious. THE TIMES Is ChatGPT the end of creative industries as we know them? An ethical quagmire from which there is no return. A threat to all our jobs as we keep hearing on the news. Bestselling children's author Andy Stanton has made a career out of writing differently from the unconventional hero of his bestselling Mr Gum series to his penchant for absurdist plots. His children's books are anything but formulaic. When a friend introduces him to ChatGPT the new large language chatbot, Andy is as sceptical as he is curious. Can this jumble of algorithms really mimic the spontaneity of human thought? Could it one day replace human authors like him for good? And are we soon to be ruled over by despotic robot overlords? He decides there's only one thing for it: he must test this bot's capabilities. Eventually, he settles on a prompt that will push the algorithm to its creative limits: tell me a story about a blue whale with a tiny penis. Chaos ensues. What follows is a surprising and illuminating battle between Andy and ChatGPT that maybe just might help us all understand AI a little bit better. Join Andy and his beleaguered AI lackey on a rollicking metafictional journey through the art of storytelling. Presenting his prompts and the AI-generated narrative alongside extensive commentary, Stanton provides a startling paean to the art of a good story and boundless human creativity. Hopeful and hilarious, *Benny the Blue Whale* provides a joyfully anarchic meditation on AI literature and why we write. A WATERSTONES AND NEW SCIENTIST BEST BOOK OF 2023. There's no book like it. Scholarly, childish, fascinating, and hilarious, one of our funniest writers dissects what it takes to build a story and what that tells us about being human. It'll really make you think if you can stop laughing. Chris Addison, co-creator of BREEDERS. Entertaining and alarmingly relevant.

**Redundancy at information and data level** Niklas Haug,2024-08-02 Research Paper undergraduate from the year 2024 in the subject Computer Science General grade 1 0 language English abstract Almost any system used in daily life relies on transmitting data Whether it s sending a message to a friend transferring money to a bank account or streaming a movie

on Netflix data is being transmitted from one point to another. However, data transmission is not always error free. Errors from both humans and machines are quite common and can occur due to various reasons including Transposed digits e.g. when typing an IBAN or an amount of money into a banking app. Noise in the communication channel, Interference in wireless communications, Hardware malfunctions or software bugs. Although we cannot eliminate the occurrence of errors true to the motto 'Shit happens' we can implement measures to detect these errors and ideally correct them without having to retransmit the corrupted data, a process known as Forward Error Correction (FEC). These measures range from simple methods such as checksums implemented in numbers used every day e.g. IBAN, ISBN, EAN to complex algorithms like Reed-Solomon codes used in communication systems and storage devices. For instance, the ability to correct errors allows data on a CD which may be partly corrupted due to physical scratches to be reconstructed and ensures that QR codes remain scannable and decodable even when partially soiled or illegible.

### **1 The Twilight Of The Gods**

Francisco Jerbesson De Freitas

Morais, 2025-12-05  
SYNOPSIS: THE TWILIGHT OF GODS Professional version for cover Amazon marketing and back cover  
On a night marked by blood and fire, young Aiden watches his family being brutally massacred by the rival clan that rules the neighboring lands. But he does not yet know the truth: those men were not acting alone. They were corrupted by ancient gods forgotten entities seeking to regain the power they lost millennia ago. Devastated and alone, Aiden flees into the forest as twilight falls, the moment when the veil between worlds grows thin. There, surrounded by silence and despair, Lucifer the First Fallen and Kael, his general, materialize before him, offering a forbidden choice: power great enough to destroy his enemies in exchange for his soul and eternal loyalty. But the pact that should have been a simple bargain awakens something far greater. By accepting Lucifer's qualities, Aiden becomes the bearer of a force that gods fear and demons long to control. His soul becomes the battlefield for the beings who once shaped creation. The massacre of his family was only the beginning. A war between primordial gods and fallen demons is about to erupt, and Aiden is the key to the end of an era. In this dark epic of vengeance, power, and destiny, what began as a pact transforms into a confrontation that could ignite the Twilight of Gods and the rebirth of a new world.
