**The Shortest Hour** Lee Parrish, 2024-07-18 Independent directors of corporate boards understand the importance of cyber security as a business issue Increased regulatory requirements the onslaught of breaches as well as the replacement of the corporate network perimeter with more third party partnerships have all contributed to cyber security rising to the top of enterprise risks Yet many directors only receive a few brief cyber security updates during the year Moreover many directors have devoted their careers to other important business disciplines and may not fully grasp the technical concepts of cyber security The challenge is that many publications on board cyber security governance address the topic at such a high level that it removes the important context of the cyber security details or covers the topic too deeply with hard to understand technical language These resources may often provide lists of security questions for directors to ask of their management team but they do not provide the answers to the questions so that actionable oversight can be performed What I would have wanted and why you are probably reading this book summary is a resource that delivers the questions to ask but also provides the answers and in a narrative easy to understand style An award winning Chief Information Security Officer with over two decades of working with multiple Fortune 500 boards Lee Parrish provides an example laden vision to improve cyber security governance in the boardroom Additionally Lee deciphers the technical jargon to increase the reader's cyber fluency not to make you a cyber expert but to help you be able to ask direct questions understand the answers provided challenge strategies and advise on important cyber decisions Pick up your copy of The Shortest Hour An Applied Approach to Boardroom Governance of Cyber
