CAD-Based Optical Design with Quadoa Rafael G. González-Acuña,2025-03-13 In *CAD Based Optical Design with Quadoa* we explore how optical design entails evaluating application requirements and creating optical systems

specifically engineered to meet the exact needs of optical instruments This extensive system may include optics light sources sensors electronic boards display devices and other components Primarily optical design focuses on determining the shapes positions and materials of lenses and mirrors to ensure the optical system adheres to indicated criteria and specifications To meet specific requirements lens designers must use optical design software as an aid for their challenging task Most of the mentioned optical design programs are based on the idea of a spreadsheet that contains the information on each surface radius thickness materials and position among other parameters This paradigm has its positive aspects and negative aspects But optical design is a field under constant evolution and new ways to design optical systems are emerging In this book we are going to construct optimize and analyze optical systems under the fresh paradigm of Computer aided design CAD with the help of Quadoo Optical CAD a novel optical design software Within the chapters of the book we are going to see why this paradigm can be very useful in designing optical systems in comparison with the one proposed by spreadsheets The purpose of this book is to teach optical design with a fresh and reliable tool Quadoo Optical CA This book mixes the classical books in optical design and a manual of Quadoo Optical CAD The purpose of this blend is to give readers enough knowledge to start a practical optical design with solid theory and robust tools in Quadoo Optical CAD *Optical Design and Analysis Software*
