Teaching Science in Elementary and Middle School Joseph S. Krajcik, Charlene M. Czerniak, 2018-06-12. Teaching Science in Elementary and Middle School integrates principles of learning and motivation with practical teaching ideas for implementing them. Paralleling what scientists do, project-based learning (PBL) represents the essence of inquiry and the nature of science and engages children and teachers in investigating meaningful real-world questions about the world around them. This text provides concrete strategies on teaching using a project-based approach and on meeting the principles in A Framework for K-12 Science Education and the Next Generation Science Standards. NGSS Features include strategies for planning long-term interdisciplinary, student-centered units; scenarios to help readers situate new experiences; and a wealth of supplementary material on the Companion Website. Features in the Fifth Edition: Integrates research-based findings from the National Research Council's Taking Science to School; A Framework for K-12 Science Education and NGSS to engage learners and help them make sense of phenomena in using disciplinary core ideas, science and engineering practices, and crosscutting concepts; Gives attention to cultural diversity throughout the chapters with an added focus on working with English Language Learners; Describes how to develop and use assessments that require students to make use of their knowledge to solve problems or explain phenomena; Illustrates how to use PBL to make connections to Common Core Standards for Mathematics and English Language Arts; Provides examples of project-based lessons and projects to illustrate how teachers can support children in engaging in scientific and engineering practices such as asking questions, designing investigations, constructing models, and developing evidence-based explanations.
