Kunkhuli, 2014-03-05 The study was in response to the pressing quest for educational qualitative improvement in Zambia. An alternative qualitative method to school improvement is suggested. The study describes and examines the administrative and leadership characteristics and climates of five Zambian secondary schools designated and nominated by the Ministry of General Education and Culture as successful schools. Interviews and questionnaires administered to headteachers and teachers were used for data collection. Content and item analysis in the interviews and questionnaire responses were used. The findings are not consistent in all the five schools investigated with the literature on effective schools. No school covered was perceived favourably in all the five dimensions tested. Appropriate recommendations are made for policy makers, practitioners and stakeholders.
